

Braintree PayPal Settings

Braintree Payments

See [documentation](#) on Braintree Payments for other help topics.

Your Customer Self Service site can offer and manage PayPal checkout and express options through Braintree Payments. With this option, PayPal payment is available on the Braintree tab during checkout and PayPal Express is controlled through Braintree settings. All PayPal transactions processed through the Braintree gateway will be integrated and viewable in your Braintree Control Panel.

NOTE - You will still need to establish a PayPal merchant account separately as payment processing fees will be charged by PayPal. Braintree does not charge fees for handling PayPal transactions.

Braintree PayPal

These Braintree PayPal options can be enabled on your site:

- **PayPal** on the Braintree Payments 'Payment Methods' tab during the checkout process.

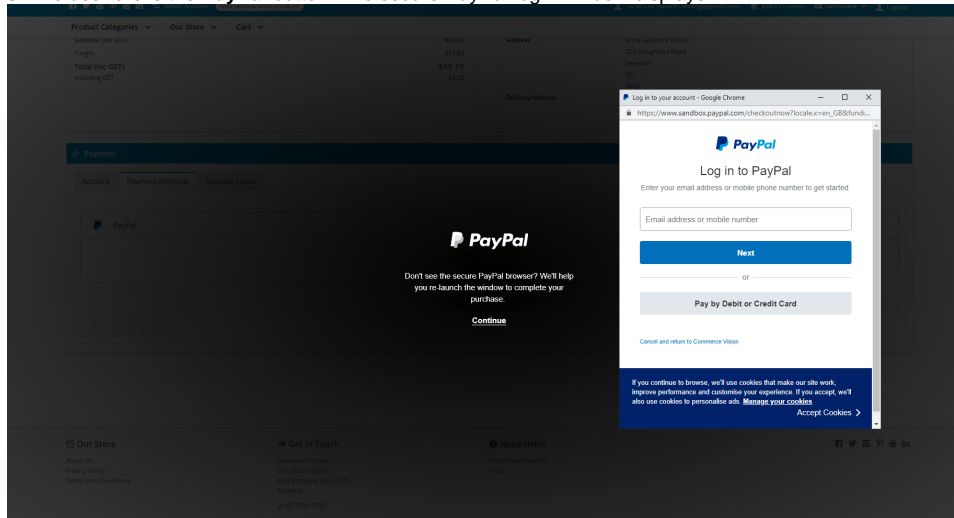

1. In the **Payment** panel during checkout, **PayPal** displays as a payment option under Braintree's **Payment Methods** tab.

2. When **PayPal** is selected, the **PayPal** button is displayed.

3. The user clicks the **PayPal** button. The secure PayPal login window displays.

4. The user logs into their PayPal account and selects from available payment options. After payment selection has been approved, they are returned to your website. The PayPal account with login ID is displayed.

5. The user clicks **Process Payment** to complete payment. If 'Allow Vault PayPal' is enabled in Settings, a successful PayPal account will be vaulted ready for future purchases. **NOTE** - If **vaulting** is on, Pay in 4 will not be offered as an option to a logged in registered user.

- **PayPal Express options.** PayPal payment methods accessed through buttons on the product and cart pages. They are 'express' because the customer can log in to PayPal immediately to pay without adding to cart and going through the usual checkout process steps. Choose one or both Express options: PayPal Checkout, Pay in 4 (PayPal's Buy Now, Pay Later).

NOTE - Enabling Braintree PayPal Express checkout through Braintree settings disables the use of separate [PayPal Express settings](#).

Configure PayPal Settings

Before configuring PayPal settings, ensure you have a PayPal merchant account and your PayPal merchant credentials have been added in your Braintree account.

PayPal Testing

For help on testing your Braintree Paypal integration, see documentation from [Braintree](#).

To configure Braintree PayPal settings:

1. In the CMS, go to **Settings Payment & Checkout Braintree Payment**.

2. If the **Available in CMS** toggle is not enabled, toggle it ON.
3. Click **Configure**.
4. Scroll down to **PayPal Settings**.

5. To enable Braintree PayPal on your site, toggle ON **Enable PayPal**.

Overrides 0

When Braintree PayPal is enabled, non-Braintree [PayPal Express settings](#) are disabled.

Navigate to **Settings Feature Management Payment & Checkout PayPal Express**. The **Use Braintree For PayPal Express** toggle is ON.

6. **Allow Vault PayPal:** Toggle ON to automatically save a successful PayPal payment for future use. **IMPORTANT-** PayPal vaulting is incompatible with offering Pay in 4 through the checkout process for logged in users. When enabled, PayPal Pay in 4 will not be displayed as a payment option to the user in their PayPal account. It will still be available for guest users.

Overrides 0

7. The next few toggles and fields set **PayPal Express** options for the product and cart pages.

Product Page PayPal Express Buttons

- Enable PayPal Express:** toggle ON for PayPal Express to be controlled by Braintree Payments. **NOTE -** This disables any non-Braintree PayPal Express settings on your site.
- Display PayPal Express On Cart:** toggle ON to display PayPal Express buttons on the Cart page.
- Cart Page PayPal Express Buttons:** to select what Express buttons display, click in the field, then select the button(s). (Buttons display on the page in the selection order entered here.)
PayPal: PayPal button
Paylater: Pay in 4 button

What is the difference between the buttons?

Allows quicker access to a payment option when user logs into their account

PayPal button - default payment option the user previously selected displays first.

Pay in 4 button - Pay in 4 is offered first.

d. Display PayPal Express On Product Detail: toggle ON to display PayPal buttons on the Product Detail page.

e. Product Page PayPal Express Buttons: to select what Express buttons display, click in the field, then select the button(s). (Buttons display on the page in the selection order entered here.)

PayPal: PayPal button

Paylater: Pay in 4 button

8. To save your settings, click **Save**.

Customise PayPal Express buttons

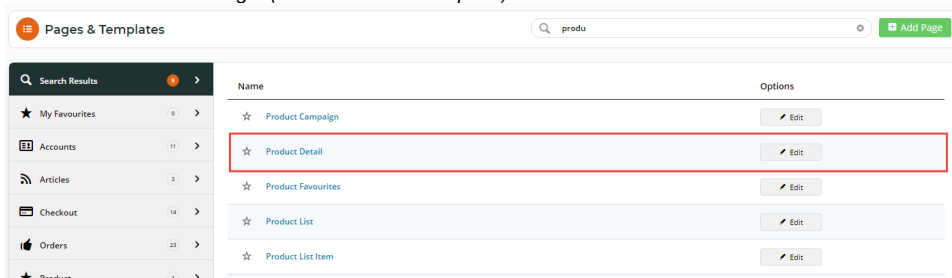

The default PayPal Express buttons are: [Product Purchase Detail Widget](#) and the [Cart Checkout Button Widget](#). You can customise how they look on the Product Detail and Cart pages in the widgets controlling their display:

To customise Express buttons:

1. Go to **Content Pages & Templates**.

2. Use the **Search** tool to find the template with the Product Purchase Detail Widget (the **Product Detail** template) or the Cart Checkout Button Widget (**Checkout Cart** template).

3. Click **Edit**.

4. Find the **Widget** and click **Edit** next to it.

PayPal Button options	
Layout	<p>For multiple buttons, select to align them vertically or horizontally.</p> <p>Default: vertical</p> <div><div>PayPal Checkout</div><div>Pay in 4</div></div> <p>Option: horizontal</p> <div><div>PayPal Checkout</div><div>Pay in 4</div></div>
Height	<p>Specify a height from 25px to 55px.</p>

	NOTE - To use the default height (set by Braintree), do not add this setting.
Colour	Default: Gold (PayPal-recommended as the brand's most recognised button colour). Options: blue (recommended first alternative), silver, white, black
Shape	Default: rectangle (PayPal-recommended)  Option: pill 
Label	Default: PayPal (recommended)  Options: PayPal Checkout  PayPal Buy Now  Pay with PayPal 

Add/Edit Pay in 4 messaging

There are two Pay in 4 messaging versions:

- **generic** - standard messaging suitable and available for any page or template. Just add the [PayPal Pay Later Generic Summary Widget](#) to a page. A generic message can also be added in the Braintree Payments space on the Checkout page. Just toggle on the setting in the [Checkout Payment Options Widget](#). (**NOTE** - Messaging is hidden for registered users when vaulting is on.)

 **Payment**

Credit Cards and PayPal

BPay

Choose a way to pay

 Card

 PayPal

 Process Payment

 Pay in 4 interest-free payments on purchases of \$30-\$1,500. [Learn more](#)

- **with instalment amount** - messaging includes the actual amount of each instalment based on the product price or cart total on the page at the time. This is automatically enabled on the product detail page, cart page and the cart summary popup. To disable the messaging, just toggle off the Pay Later message under the Braintree tab in the relevant widget:
 - Product Detail page - [Product Purchase Detail Widget](#)
 - Cart Summary window - [Cart Summary Widget](#)
 - Cart Order Summary page - [Cart Order Summary Totals Widget](#)

To customise the messaging style, in the widget:

1. Click **Edit** next to **PayPal Pay Later Messaging Options**.

Ratio 8x1. Flexes between 250px and 768px wide.

Ratio 20x1. Flexes between 250px and 1169px wide.

1. To hide the PayPal Pay in 4 message, toggle ON **Force Hide Pay Later Message**.

Why would I want to hide the messaging?

This messaging is not controlled by where the Pay in 4 button is located. It simply displays after the Express buttons. So it may not display where you would like it to be. You can always add Pay in 4 messaging where you want it by adding the [PayPal Pay Later Generic Summary Widget](#) on any page or template.

2. To save changes, Click **Save**.

Additional Information

Minimum Version Requirements	4.31
Prerequisites	Braintree Account, third party payment accounts
Self Configurable	Yes
Business Function	Payment Types
BPD Only?	Yes
B2B/B2C/Both	Both
Third Party Costs	Fees may apply
