

Mobile Menu Zoned Widget

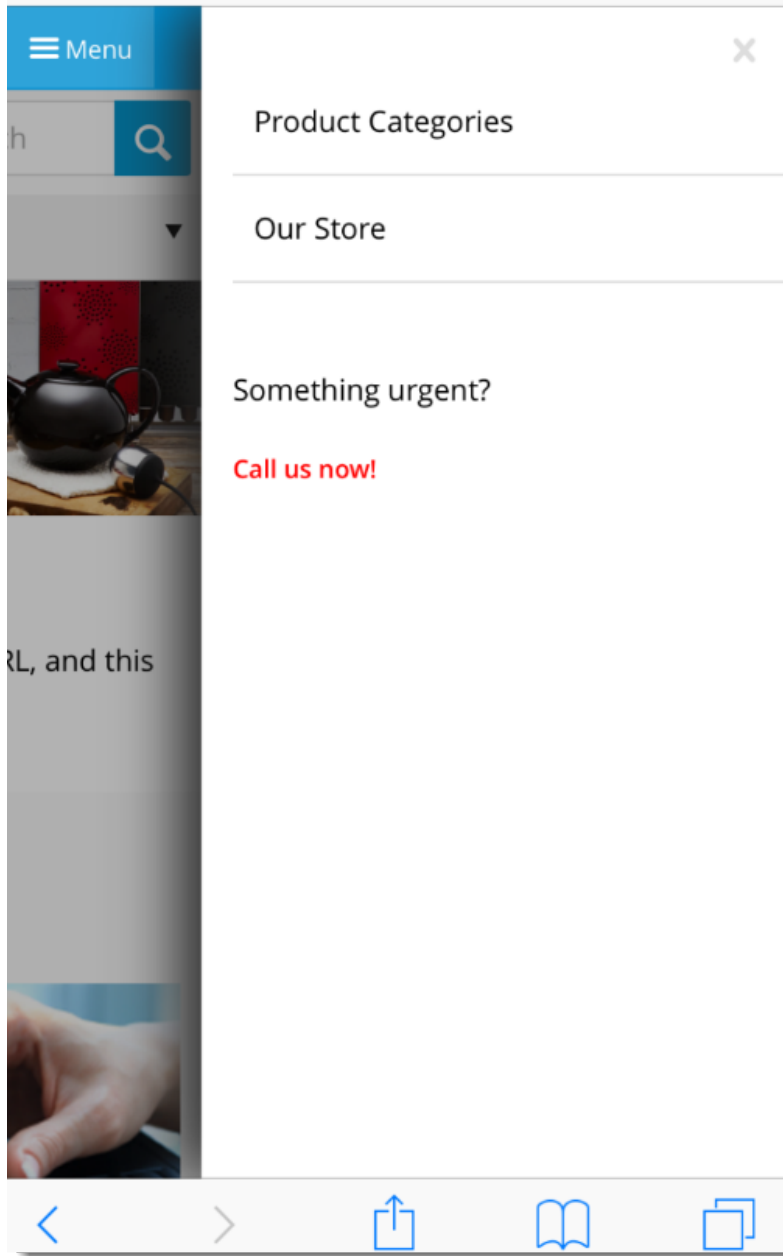

Widget Use

Allows for a zoned Mobile Menu instead of the standard Mobile Menu, which adds flexibility to the menu's content and layout. With a zoned mobile menu, additional widgets such as images or HTML snippets, can be added.

A 'Menu' button is displayed in the mobile header, which slides the menu out to the right on click.

Example of Widget Use

Following is an example of the widget in use:

Where can the Widget be placed?

The widget can be used in the following templates:

- Theme Layout Template

Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	We recommend this field be updated so the widget's purpose is clear at a glance from the template page.	All
Layer	The layer the widget is valid for.	<p>The layering technology allows for the content to be shown to specific audiences.</p> <p>This is handy if the content is only valid for a certain type of user, or if the same widget is required for more than one audience but different configurations are needed.</p> <p>The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.</p>	All
Menu Label	The text displayed for the menu link / button in the header zone.	Default: Menu	3.88
