# Carousel Options

Overview

Features that have image slideshow/carousel contain Carousel Options in the controlling widget. Some widgets that have Carousel Options include:

- Slider Banner
- Article Slider

Example

Settings

1. Click **Edit** to set carousel options.

2. In **Name**, select the carousel setting.

3. Enter or select the **Value**. (See: Setting Names & Values)

4. Click **Add**.

5. When finished with all settings, click **Apply**.

Settings Names & Values

Includes all Carousel options provided for plugin video, lazyload, autoheight and animate.

* Commonly set by Commerce Vision customer websites. To use the default for a setting, there is no need to manually add it.

Name	Values
Items*	Number of items (images, products, articles, etc) displayed on the screen at a time. Default: 3
Margin	Right margin (px) for each item. Default: 0
Loop*	Move items in infinite loop? Toggle ON or OFF. Default: OFF
Center*	Centre the starting/current item and show partial previous/next item? Works well with odd item number. Default: OFF
MouseDrag	Allow dragging with mouse? Default: ON
TouchDrag	Allow dragging on touchscreens? Default: ON
StagePadding	Add padding in pixels to the stage, making off-stage next/previous item visible ? Default: 0
AutoWidth	Allow variable width for items in the carousel? Default: OFF
StartPosition	Item number to start on when page loads. Default: 0
Nav*	Show Next/Previous buttons? Default: OFF
Rewind	Slide backwards to previous item direction when last item reached instead of looping to the first slide? Default: ON
NavText*	The text for Next/Previous buttons when Nav is ON. Default: 'next','previous' **TIP -** use HTML to style it to suit your site.
NavElement	HTML Default: div
SlideBy	Set how slides to move to next. Next one (default of 1) or by two, three, etc? Default: 1
Dots*	Show dots at bottom of banner to indicate navigation? Default: ON
DotsEach	*(Dots must be ON.)* Enter 'True' for a dot to indicate one page in the sequence, or a number for the number of pages a dot represents. Default: False
Autoplay*	Set the carousel to move to the next slide automatically. Default: OFF
AutoPlay Timeout*	*(Autoplay must be ON.)* Interval time before carousel starts and between slides, in milliseconds (1 second = 1000 milliseconds). Default: 5000 (= 5 seconds)
AutoHoverPause*	Pause when mouse hovers over banner? Default: OFF

SmartSpeed	The time it takes for all slide animations to complete.
	Default: 250
AutoPlaySpeed	*(AutoPlay must be ON.)* The time (in milliseconds) for AutoPlay slide animation to complete.
	Default: false
NavSpeed	*(Nav must be ON.)* The time (in milliseconds) for the Next/Previous navigation slide to complete.
	Default: false
DotSpeed	*(Dots must be ON.)* The time (in milliseconds) for the dot navigation slide animation to complete
	Default: Number/Boolean
DragEndSpeed	The time (in milliseconds) for the animation to complete once you stop dragging the slider left or right.
	Default: false
Callbacks	*(Needs Commerce Vision consultation)* Listens for specific events and allows advanced/custom JS manipulation of the Carousel.
	Default: ON
Responsive	Object containing responsive options for browser width breakpoints. • Each breakpoint key can be a Number value or a string: '480'. • Carousel has a in-built sort option but it's best to set from the smallest screens to the widest. • Responsive options **always** overwrite top level settings. • As default, the responsive option is set to true so carousel always tries to fit the wrapper. Set to 'false' to remove responsive capabilities, e.g., if your layout is non-flexible. Default: empty object
Responsive RefreshRate	*(Responsive must not be 'false'.)* The time to wait after you changed the browser width to perform refresh actions (calculating widths/ cloning items etc.) Default: 200
Video	Allow a video to be embedded to play in the banner
	Default: OFF
VideoHeight	*(Video must be ON.)* Set embedded video height.
	Default: OFF
VideoWidth	*(Video must be ON.)* Set embedded video width.
	Default: OFF
AnimateOut	Animation effect type when item leaves user's view.
	Select value from dropdown list.
AnimateIn	Animation effect type when item enters user's view.
	Select value from dropdown list.
ItemElement	The HTML container type for each individual item.
	Default: div
StageElement	The HTML container type for the entire area with the carousel.
	Default: div
NavContainer	Have Nav in custom HTML container?
	Default: false
DotsContainer	Creat a custom container for Dots using HTML, class, ID
	Default: OFF
LazyLoad	Load items only they are viewable on screen. For better page load speed.
	Default: ON

LazyLoadEager	Preload images to the right (and left when Loop is enabled) based on how many items specified.
	Default: 0
