# **Facebook Single Sign-on**

#### Overview

Facebook Sign-In is a secure (OAuth 2.0) login method. BPD sites can implement a third party sign-on method with Facebook so users can be securely authenticated using just their Facebook credentials. For sites with B2B customers, you can also set third party logins to link to existing users.

Let your B2B/B2C customers log into your site with their Facebook credentials. Reduces user 'login fatigue'.

This page guides you through the implementation of Facebook Sign-In for your site.

## Step-by-step guide

1. Get a Facebook App ID & Secret

To enable Facebook Sign-In, there's some set-up required on the Facebook side. Follow the steps below.

1. Navigate to the Facel	book for	Deve	elopers pag	e http:	s://developers.faceboo	k.com/ - and clicl	k 'Log	j In'.
facebook for developers	Products	Docs	Tools & Support	News	Videos	Search	Q	Log In

2. Login with your Facebook account, then click 'Get Started' at the top of the page. You'll be prompted to create a Facebook for Developers account (click Next).

3. Follow the prompts to create your account, then once you're in your dashboard, click 'Add Your First Product'.

4. In the Add a Product section, locate Facebook Login and click Set Up.

5. Select Web as the platform you're setting up for.

- 6. Enter your Website URL and Continue.
- 7. The steps that follow provide you with javascript and status codes that you will not need (as we do the hard work for you in the CMS). You can skip through these remaining steps.
- 8. Next, navigate to Settings Basic.

🛱 Settings	*
Basic	
Advanced	

- 9. Enter the URL for your website's Privacy Policy (a link to this page is displayed to users who use Facebook login on your site).
- 10. You can also update the other fields here if you choose, such as an App Icon (your company logo, perhaps?), the display name, domain, and category. Only the Privacy Policy URL is mandatory.

- 11. While on this page, take note of your App ID and App Secret. Copy and paste them somewhere handy you'll need these once you get to the Commerce Vision CMS.
- 12. Click **Save Changes** at the bottom of the page.
- 13. Finally, click the OFF toggle in the status bar to turn this app on. You'll be prompted to select a category (if you haven't already) and Confirm.

14. Check that the status updates to  ${}^{\prime}\textsc{ON}{}^{\prime}$  and the Status: Live.

#### 2. Configure Facebook Login in the CMS

Now it's time to set up your website.

- 1. In the CMS, go to Settings Feature Management User.
- 2. Toggle on Third Party Login
- 3. Click Configure.

### 3. Optional Customisations

Don't like the button text on the Registration page? Wish the login pop-up didn't use the phrase "social network"?

No worries - you can customise this via the widgets!

(i) Change the text on the **Registration / Link User page** here:

1. Go to Content Pages & Templates.

- 2. Search for and select the Third Party Login Registration template.
- 3. Edit the Single Sign-on Registration Fields widget.
- 4. Update the headings, button labels, and prompts here.

2 Third Party Login Registration Fields			
Search	Titles		
General Octions	Complete Your Registration Title *	Complete Your Registration	
General Options	Link Account Heading *	Link Account	
Personalisation	Complete Your Registration Heading *	Complete Your Registration	
Titles			

#### (ii) Change the headings on the Login pop-up here:

- 1. Navigate to Content Theme Layout.
- 2. Edit the Login Logout Popup widget.
- 3. Select the Titles tab to update the headings.

🤨 Login / Logout	Рорир		8
Search	Titles		
General Options	Modal Header	Login	
	Third Party Login Buttons Heading *	Login with a social network	
Personalisation	Email Login Heading *	Login with email	
Titles			

Facebook Sign-In is a great way to get your customers logged in and shopping with you faster. And your users will no doubt appreciate **not** having to remember yet another password!

$\odot$	Keen to offer Google Sign-in as well? Check out our guide here Google Single Sign-on.
---------	---------------------------------------------------------------------------------------

#### Additional Information

One of several single sign-on options to help enhance user experience and reduce user 'login fatigue'.

Minimum Version Requirements	04.03.00
Prerequisites	'Third Party Login' enabled.
Self Configurable	Yes
Business Function	Website Users
BPD Only?	Yes
B2B/B2C/Both	Both
Third Party Costs
