

Deploy Section Menus

Want this feature?

Deploy Content is part of the CV eCommerce Platform's franchiser and multisite website features. It must be enabled by Commerce Vision.

Requires: 2022.3.

On this page:

Overview

The [Menu Editor](#) feature must be enabled.

For multisite control, Administrator and Content Administrator roles on a deploying site can copy over [Section Menu](#) items to valid CV destination sites in their organisation's network.

NOTE - A section menu is not a lockable content object. This means CMS users on destination sites can rollback deployed contents, and add, edit or delete these section menus. See: [Deploy Content](#)

What Section Menu data are deployable?

- menu items on section menus already on the destination site

Enable Deploy Section Menus

1. In the CMS, go to **Settings** **Settings** **Feature Management** **Content** **Deploy Content**.
2. Make sure **Deploy Content** is enabled, then click **Configure**.
3. On the **Deploy Content Feature Settings** page, toggle ON deploy for **Section Menus**.

4. Click **Save & Exit**.

Deploy a Section Menu

You can deploy selected section menu items or the whole section menu.

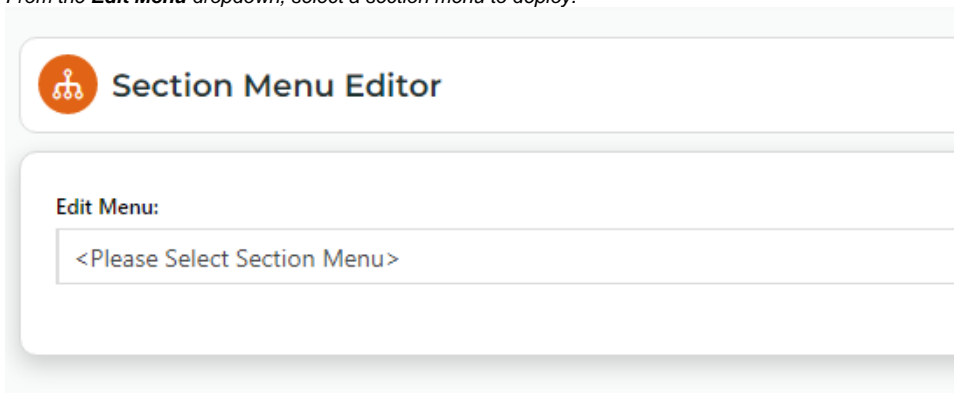

Think of the deployment process as completing one or more **copying sessions**.

- In a deployment instance, data type(s) and items are selected to be copied over to **one** destination site.
- A successful  deployment instance is when all selected item data were deployed to a destination site. If one change fails to deploy, the whole deployment instance will fail. No changes will be copied over to this site.
- A failed  deployment instance is when no selected item data were deployed to a destination site.
- If you selected multiple destination sites, you are initiating multiple deployment instances.

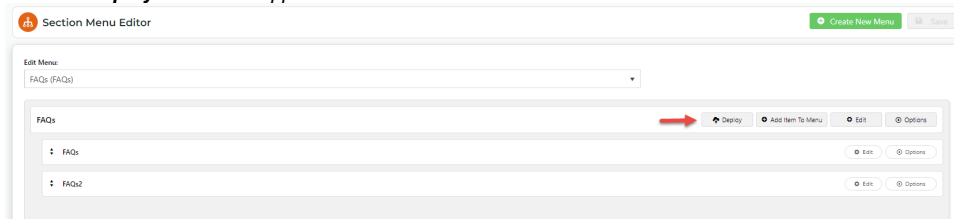

1. On the navigation menu, go to **Content** **Navigation** **Section Menu Editor**.

2. From the **Edit Menu** dropdown, select a section menu to deploy.

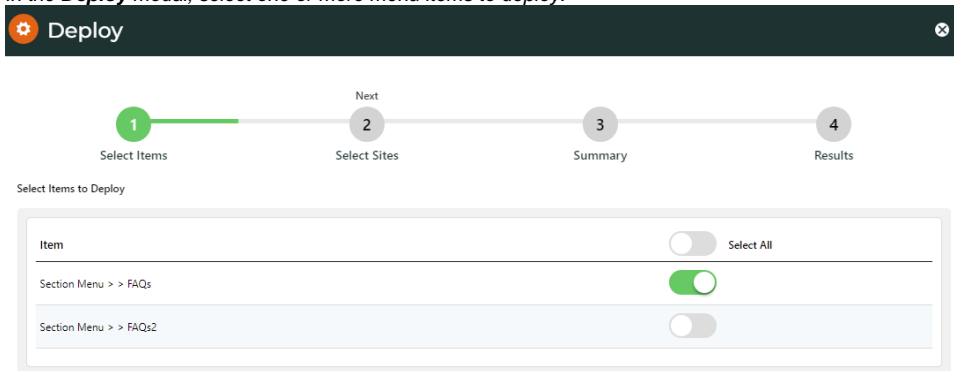

The image shows the 'Section Menu Editor' interface. At the top, there is a header with an orange icon and the text 'Section Menu Editor'. Below this, there is a section titled 'Edit Menu:' followed by a dropdown menu that currently displays '<Please Select Section Menu>'. The interface is clean and modern with a light gray background.

3. Click the **Deploy** button that appears for the menu.

This image shows the 'Section Menu Editor' with the 'Edit Menu' dropdown set to 'FAQs (FAQs)'. Below the dropdown, there is a list of menu items: 'FAQs' and 'FAQs2'. Each item has an 'Edit' button and an 'Options' button. A red arrow points to a 'Deploy' button located at the top right of the menu items list. The 'Deploy' button is highlighted with a red border.

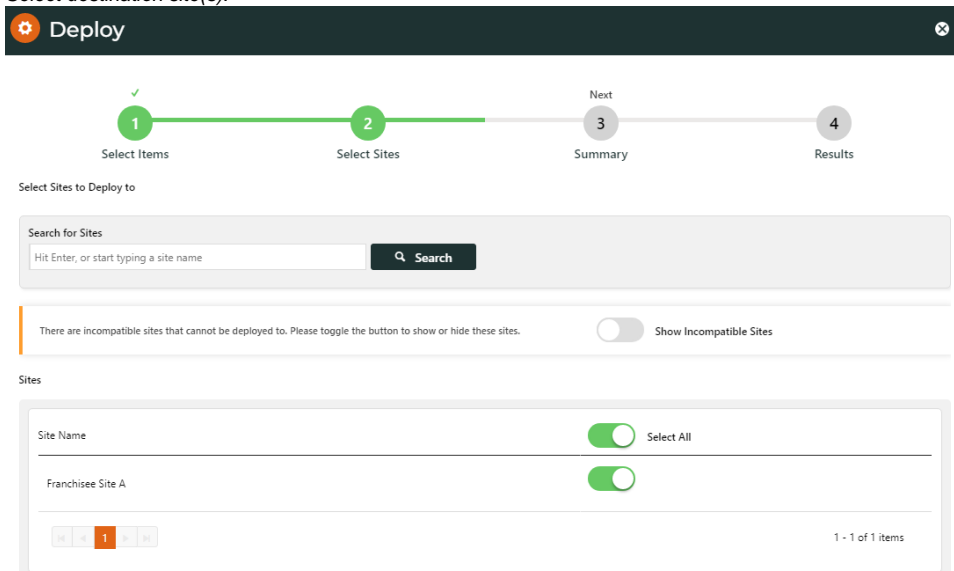

4. In the **Deploy** modal, select one or more menu items to deploy.

The image shows the 'Deploy' modal in the 'Select Items' step. At the top, there is a progress bar with four steps: 1 (Select Items, highlighted in green), 2 (Select Sites), 3 (Summary), and 4 (Results). Below the progress bar, there is a section titled 'Select Items to Deploy'. It contains a table with two columns: 'Item' and a toggle switch. The first row is 'Section Menu > > FAQs' with a green toggle switch. The second row is 'Section Menu > > FAQs2' with a gray toggle switch. A 'Select All' button is located to the right of the toggle switches.

5. Click **Next**.

6. Select destination site(s).

The image shows the 'Deploy' modal in the 'Select Sites' step. At the top, there is a progress bar with four steps: 1 (Select Items), 2 (Select Sites, highlighted in green), 3 (Summary), and 4 (Results). Below the progress bar, there is a section titled 'Select Sites to Deploy to'. It contains a search bar with the text 'Search for Sites' and a 'Search' button. Below the search bar, there is a message: 'There are incompatible sites that cannot be deployed to. Please toggle the button to show or hide these sites.' followed by a 'Show Incompatible Sites' toggle switch. Below this, there is a section titled 'Sites' containing a table with two columns: 'Site Name' and a toggle switch. The first row is 'Franchisee Site A' with a green toggle switch. At the bottom, there is a pagination control showing '1 - 1 of 1 items'.

7. Click **Next**.

8. Review the deployment details, then click **Deploy**.

 Deploy 

1

Select Items

2

Select Sites
