

Product Afterpay Summary Widget

Widget Use

Renders the Afterpay information on the product detail page. This widget is used instead of (or possibly in addition to) the [Product Purchase Details widget](#), to allow for customisation of placement on the page.

Example of Widget Use

Following is an example of the widget in use:

Where can the Widget be placed?

The widget can be used in the following templates:

- Product Detail Template

Widget Options

Option	Use	Comments	Available from Version
Description	The description of the widget	It is recommended to use this so the reason for use of the widget is seen from the template page	All

Layer	The layer that the widget will be shown on	<p>The layering technology allows for the content to be shown to specific audiences.</p> <p>This is handy if the content is only valid for a certain type of user, or if the same widget is required for more than one audience, but different configuration is needed.</p> <p>The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.</p>	All
Strip Zero Decimal Amounts	<p>When the price is an even dollar amount, the cents are stripped from the display.</p> <p>(For example, \$147.00 would be displayed as \$147)</p>	<p>Default is: unticked</p> <p>Tick to enable</p>	3.95
Attributed Product Price Display	<p>Determines the price shown for master products appearing in the list. Select from:</p> <ul style="list-style-type: none"> • Default Functionality • Don't Show • Price From Default • Price From First 	<ul style="list-style-type: none"> • Default Functionality - the nett price for one is displayed. This value is derived from the master code. • Don't Show - no price is displayed for master products - the user must select attributes in order to view pricing. • Price From Default - the price for the option marked as 'Default' in Attribute Maintenance is displayed. • Price From First - the price for the first attribute option in the list is displayed. 	3.95
