

Single Sign-on Registration Fields Widget

(Formerly known as the Third Party Login Registration Fields widget)

Widget Use

Renders the Registration / Link User fields (depending on configuration) on the Login page after a user signs in with a social network.

Example of Widget Use

Link User fields	Registration fields
<p> Login</p> <p>Almost Done!</p> <p>Link to an existing user account?</p> <p>Email Address *</p> <input type="text"/> <p>Password *</p> <input type="password"/>	<p> Login</p> <p>Almost Done!</p> <p>Finish registration</p> <p>Company</p> <input type="text"/> <p>Job Title</p> <input type="text"/> <p><input type="checkbox"/> I would like to receive occasional promotional r</p> <p> Login</p>

Where can the Widget be placed?

The widget can be used in the following templates:

- Third Party Login Registration Template

Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	This description is added to the widget title. It makes the widget's use clear on the template page.	All

Layer	The layer the widget is valid for.	Use layering to limit widget content to certain groups of users. To use the same widget for more than one user group but with different options set, add the widget as many times as needed in the same zone. Then add layering to define the user group each time.	All
Hide Registration Section?	Whether registration fields are displayed or not when a user first signs in with a third/single party sign-on method. When hidden, users are prevented from registering as unlinked to existing Users.	Default: OFF IMPORTANT - This must be enabled when the 'Force Linking To Existing Users' option is active. See Facebook Sign-in .)
