## Overview

With this promo type, you can create offers where you can give customers buying a set number of one Product a discount on a set number of the same Product or a different Product. You can also use this promo code with a Product with variants.

This Product promo code allows you to give customers a discounted price for a specified quantity ( Y ) of a product when they buy a certain number ( X ) of a specific product. You can work this promo in different ways. One is some variation of the 'buy two pizzas, get one garlic bread at a discounted price'. Another is the "buy two pairs of glasses, get one at the discounted price' offer. It can also be used with Master products so that all child products are automatically included. (See Special use with Master product below.)

## Step-by-step guide

This guide will help you create a promotion using this promo code type.

1. In the CMS, navigate to Campaigns \& Promotions Promotion Codes.
2. Click Add Promotion Code.
3. In the Select Promotion Type list, select Product.

## Create a New Promotion Code

Select Promotion Type:
Product $v$
4. Select the scenario 'When I buy X quantity of specific product then I can buy Y quantity of specific product at a specified price'.

```
Select Promotion Type:
Product
Selected Scenario:
Repeat Product % Discount Promotions
Wth nits promotion, once the customer bugs the
elsount on the promo prosuct busever w
secelve a repert promo podevin emoll You
custorer can then return to purchase more
promo prosucts at the discounted price, without
having to meact the minimum quancligy again.
When I buy X quantity of specific product
then I can buy Y quantity of specific
product at a specified price
Using this promoton code, the custome- can bu)
argouct er a specifc price ster buyng tha
reguiced ouantioy of an eligole produch.
Quantity Break Pricing
Using this promotion code, the custome gets a
discounted price on a particulor product atter
purchasing the required quarcify
```

5. Enter the Promotion Code your customers will use at checkout.

Promotion Code *
CheapGarlicBread

- The code that the end user enters into the 'Apply Promotion Code' field,

6. Enter a Description. This will be displayed in the user's cart and in their order summary.

Description *
$\$ 1$ garlic bread when you buy 2 large pizzas
(2) The description of the promotion code when it is displayed on the cart and order summary
7. Set the promotion's Start and End Dates.
8. Enter the Discount Quantity Threshold. This is the number of qualifying product your customer must purchase to be eligible for the discounted pricing.
Discount Qty Threshold
2
(2) The total quantity of eligible products on the order must meet this threshold before the promotion code will apply
9. Add the Eligible Product, searching by either description or code. (Once you click Add, the description will be replaced by the code only).
10. Add the Special Price Product, again searching by description or product code. This product can be different from the Eligible Product (as in the pizza and garlic bread example) or the same (as in the glasses example).
Special Price Product

| Product Code |
| :--- | :--- |
| CV409 V |

11. Enter the Qty of the product your customer can buy at the discounted price when they qualify for the promotion. Qty *

1
Price *
1.00
12. Decide whether this promo will Apply In Multiples. That is, if 2 pizzas qualifies your customer for 1 cheap garlic bread, then 4 pizzas will entitle them to 2 cheap garlic breads.
Apply In Multiples
(3) If the order meets the threshold multiple times, the promotion will be appliedin the equivalent multiple. (e.g. Buy X quantity of product $A B C$ at a fixed price for every $Y$ quantity of eligible products purchased.)
13. Click Save \& Exit to finish creating your promo code.

Please be aware that there are also additional advanced options that you can configure for promotions. They become available after the promo is created. You'll find info on these under Advanced Options, later on this page.

## Special use with Master and Child products (variants)

Master products are products that have child products (variants). (For details on how they work, see the Product Variants page.)

You can use this promo code type with products in a Master/Child relationship in various ways. For example, 'buy any 2 variant products in a Master product range and get 1 at a discounted price' - 'buy any 3 large pizzas in our premium range and get 1 for $\$ 10$ '. Or 'buy 3 of a specific product and get 1 different product (any variant of a Master product) at a discount' - 'buy 3 pizzas and get 12 L softdrink for $\$ 1$ '.

## Use Case

In the use case here, our store sells medical garb and wants to use the promo code to encourage the purchase of matching tunic and trousers. For the pro along with the matching tunic, are added as Child products. A customer must buy one of each to get the tunic at a discount price.

## Discount Child Product

V-Neck Medical Scrub Tı
Product Code: CV154

We can now go to Promotion Codes to create the promo code.

1. Follow steps 1-4 to reach the Promo codes page.
2. Enter details of the promotion code as required. Here is an example:
End Date
- ,
Discount Qey Thresho
1.00
Eligible Product
Product Code

3. Click Save and Exit. The promo is active from the start date to the end date.

Let's say your customer adds the eligible product to their order, in this case, the medical scrub trousers, and also adds the matching tunic. In the Shopping displayed. After applying the promo code, the special price on the discount product is calculated.
Note - your customer could have also brought up the discount by adding just the correct number of eligible products, going straight to the Shopping Cart, a

## Promo Codes - Additional Options

## Access Additional Options

To access Additional Options:

While in the saved promo code, navigate to Options Edit Additional Options.

OR
If editing an existing promo code, scroll down its page and open the collapsed Additional Options section.
$\oplus$ Additional Options

Misc

- Status - the current status of the promo code
- Active: the promo code is live on your site and can be used by customers. It has not been disabled or deleted.
- Disabled: the promo code cannot be used by customers. You can switch it to 'Active'
- Deleted: the promo code is deleted from use altogether and is kept for historical records only. (NOTE - A deleted promo code can be undeleted to 'disabled' and then reactivated.)
- Criteria Fail Remove Promo Code
- ON: the promo code is automatically removed from the cart when contents get updated and promo requirements are no longer met. Users must re-enter the promo code if they want the code to be applied;
- OFF: the promo code remains in the cart when requirements are not met, If contents get updated and requirements are now met, it will be (re-)applied.
- Not Applicable With Other Offers;
- ON: promo code cannot be used when other promo codes have already been applied to the order;
- OFF: promo code can be used when other promo codes have been applied to the same order.

## IMPORTANT

Letting customers use more than one promotion code in an order must first be enabled by Commerce Vision. Contact CV Support and request stacked promotions to be enabled.

- Free Product To Be Added in Pronto (applies only for Promo Codes that add a free product)

For Promo Codes with free products, you can choose between adding the free product online upon order submission or in the ERP (Pronto) when the order is integrated. Toggle ON or OFF Free Product To Be Added in Pronto. Default: OFF

## Free Product To Be Added In Pronto

In the order placed, received and confirmation emails, how the free product is displayed depends on the option selected.

When OFF，the free product is added online．In the emails，the free product displays as an item with a cost of $\$ 0.00$ in the product order line of your Order Summary
