PRONTO Integration - Product Master + Pricing

On Integration of **'Product Master + Pricing'**, the following PRONTO tables will be integrated, triggered by change events for each table:

Table Name	Change Events	Filters
stock-master	stk-date-last-change stk-creation-date	• Alternate Product Category Field. Located in Integrator 'Settings', 'Advanced' tab, 'Other Settings'. • Item sort code range. Located in CSS 'Settings', 'Integrations' tab, 'Items' tab, field name 'Sort Code'.
stock-price	stk-date-last-change stk-creation-date	• Alternate Product Category Field. Located in Integrator 'Settings', 'Advanced' tab, 'Other Settings'. • Item sort code range. Located in CSS 'Settings', 'Integrations' tab, 'Items' tab, field name 'Sort Code'.
stock-notes	stk-date-last-change stk-creation-date	• Alternate Product Category Field. Located in Integrator 'Settings', 'Advanced' tab, 'Other Settings'. • Item sort code range. Located in CSS 'Settings', 'Integrations' tab, 'Items' tab, field name 'Sort Code'.

ⓘ **Integrating All vs Changed**: The 'Product Master + Pricing' date stamp comes from the stock record. The value of stk-date-last-change or stk-creation-date is to be greater than or equal to the last sent date of 'Product Master + Pricing'.
