

Product Attributes Import - classic sites

This article details the steps involved in importing product attributes. For information on the *manual* set-up of attributes, see [Product Attributes \(Style/Colour/Size\) - Classic sites](#).

This guide is aimed at administrators of classic CSS sites. For BPD websites, please see our [Product Variants](#) article for information on maintaining and importing product variant data in the CMS.

Step-by-step guide

To Import Product Attributes:

1. Populate an Excel spreadsheet with Master codes and attribute data (no header row), as detailed below.
2. Enter data in a tab-delimited format in columns A-C as:
 - a. **ProductCode[tab]** - Master product code from PRONTO
 - b. **HasAttributes[tab]** - Y = Yes, N = No
 - c. **AttributeList** - The list of attributes expressed as **AttributeTitle(AttributeListType{D/R}):AttributeValue, AttributeValue;AttributeTitle(AttributeListType{D/R}):AttributeValue, AttributeValue**

Attribute List Types

D = Drop-down list
R = Radio buttons

A4			
	A	B	C
1	Z-123456	Y	Size(D):Small,Medium,Large;Colour(D):Charcoal,Navy,Black
2	Z-123457	Y	Size(R):S,M,L;Colour(R):Red,White,Silver
3	Z-123458	Y	Length(D):100mm,150mm,200mm,250mm
4			
5			

3. Save the file as '**Text (Tab delimited) (*.txt)**'.
4. Login to Customer Self Service as an Administrator.
5. Navigate to '**Content**' --> '**Product Attribute**' (/ProductAttributemaintenance.aspx)
6. Click the '**Attribute import**' tab.
7. In the '**Product attributes**' window, click the '**Choose File**' button.
8. Browse to the saved .txt file.
9. Click '**Upload product attribute details**'. A confirmation message will be displayed on screen after import.

Once the attributes have been imported, the product codes/SKUs for each available attribute combination need to be imported.

To Import Product Attribute Combination Codes:

1. Populate an Excel spreadsheet with Master codes and attribute combinations (no header row), as detailed below.
2. Enter data in a tab-delimited format in columns A-D as:
 - a. **ProductCode[tab]** - Master product code from PRONTO
 - b. **AttributeTitleValueSeq[tab]** - **AttributeTitle:AttributeValue;AttributeTitle:AttributeValue**
 - c. **AttributedProductCode[tab]** - Final product code from PRONTO (this is what goes on the sales order and determines pricing and availability)
 - d. **CreateLineNote** - Y/N - If no attributed product code has been set up, but the attribute combination is available, a 'Y' in this field will prompt the system to add the Master code to the sales order with a Line Note detailing attribute values.
3. Save the file as '**Text (Tab delimited) (*.txt)**'.
4. Login to Customer Self Service as an Administrator.
5. Navigate to '**Content**' --> '**Product Attribute**' (**ProductAttributemaintenance.aspx**).
6. Click the '**Attribute import**' tab.
7. In the '**Product attribute configuration / SKU**' window, click the '**Choose File**' button.
8. Browse to the saved .txt file.

9. Click 'Upload product attribute SKU details'. A confirmation message will be displayed on screen after import.
