Product Campaigns

Overview

Product Campaigns are a simple way to feature a group of products on a website. Campaign products might be sale items, top sellers, highlighted brands, or any other criteria you fancy.

With Commerce Vision's Ecommerce Platform, you can track the number of visits, product views, and sales for the products in your campaign. Adding, removing, and editing campaigns is quick and easy. Your Ecommerce team can even drag and drop an entire campaign from one location to another on the page.

NOTE - Bear in mind that advertising campaigns on your website, e.g., home page, can use up resources and slow page load speeds down. It is suggested your website be tested for page load speeds, e.g., with tools such as PageSpeed, after adding a campaign banner.

This guide will step you through the process of creating, editing, and displaying a product campaign.

Create a Campaign

6. Repeat Steps 4 & 5 for all required products in the campaign.

On this page:

- Overview
- Create a Campaign
- Export Products from a
- CampaignImport Products to the
- CampaignDisplay a Campaign
- Related help

7. You can drag and drop the products in the list to reorder them. This reflects the order in which they'll appear to your customers.

\$	Bt Aarbied Paper - Blue Peacock CV350	O Delet
Plac	e Here	
¢	Ready, Set, Move Activity Set (CV205)	O Delet
\$	New Balance VIA Active USB Pedometer (CV111)	O Delet

8. To remove a product, click Delete on the right hand side of the product.

9. Click Save at the top of the page, and you're finished!

Edit a Campaign

Once your campaign is created, it will appear as the latest tile on the Campaigns page. (NOTE - the most recently edited campaign will appear first.)

1. Select the tile to view campaign details.

- **2.** On this page, you can:
 - Edit the Description, Start, and End Dates
 - · Add and Remove Products
 - View Campaign Statistics (as long as tracking is enabled on the Campaign Slider Widget)
 - Delete a Campaign
 - Export and Import Products to the Campaign
- 4. Save your changes.

Export Products from a Campaign

You can export the list of existing products in the campaign as a .csv file.

1. In the Options menu, select Export Products. The CSV file is automatically downloaded to your device.

Import Products to the Campaign

You can add products and/or change the display order of existing products to the campaign. To add a product individually, click the +Add Product button. You can also import products in bulk. For this option

1. In the Options menu, select Import Products or click the Import Products button next to the + Add Products button.

	Options	Cancel	🕒 Save	🕒 Save & D
Delete Campaign				
Export Products				
Import Products				

 Create a CSV file for the products you want to import. In the Campaign Product Import page, you can download an example template. This template provides details of the headers needed and an example of a product.

	А	В	С
1	CampaignDescription	ProductCode	Sequence
2	Featured Products	CV172	1
3	Featured Products	CV249	2
4	Featured Products	CV174	3
5	Featured Products	CV118	4
6	Featured Products	CV343	5
7	Featured Products	CV287	6
8	Featured Products	CV405	7
9	Featured Products	CV148	8

3. For each product you want to import, enter these details:

- a. 'CampaignDescription', enter the Campaign Name
- b. 'ProductCode', enter the product's code
- c. 'Sequence', enter the number you want the product to display in the campaign.
- 4. Save the file.

Use Overwrite to change product display order

You can use Overwrite Import if you just want to resequence the order existing products display in a campaign. In the CSV file, under the 'Sequence' header, simply change the number for each existing product. For instance, we have changed 'CV148' so it displays first by changing its number to '1'. All other products will move down in the list. **I MPORTANT-** As you can see, it's the Sequence number that controls the display order, not the position the product sits in the CSV file.

	А	В	С	
1	CampaignDescription	ProductCode	Sequence	
2	Featured Products	CV172	2	
3	Featured Products	CV249	3	
4	Featured Products	CV174	4	
5	Featured Products	CV118	5	
6	Featured Products	CV343	6	
7	Featured Products	CV287	7	
8	Featured Products	CV405	8	
9	Featured Products	CV148	1	
10				

5. In the **File Upload** section, for **Import Type**, select 'Append' if you want to add more products to the campaign, or 'Overwrite' to replace all existing products and their display orders.

6. Click Select files

7. Select the CSV file you created earlier.

8. Check the **Import Log** section for system messages about your import. If one or more products were successfully imported, Import Successful' is displayed.

You may see one or more other Import Log messages:

i. If the Import Type selected is 'Append' and the product is already in the campaign, this message is displayed. **Note**-'Line_' tells you the product row number in the CSV file. Since the Header occupies Line 1, the first product will be 'Line 2' etc.

Display a Campaign

Once your campaign is created, you can display it on your site with a widget.

- 1. In the CMS, go to the page you want the campaign to appear on. For example, **Content Other Pages & Templates**, and select the **Home page** template.
- 2. Select the appropriate zone according to your page layout, and click 'Add Widget'.
- 3. Search for 'Campaign Slider' and click 'Add Widget'.
