

Product Compare Functionality

Overview

Product Compare gives your customers the ability to compare the features of products on your website.

The user selects up to 3 products to be compared. Their features are presented side-by-side in a popup window. They can add a product to cart here (if it is available for purchase) or close the window and browse for further products to compare.

The comparison data is drawn from metadata (stored online or in the ERP), as well as any product features maintained in the CMS. Select what is displayed in the [Product Compare Widget](#).

Enable Product Compare

1. Add for Product Search results

This step enables Product Compare and adds the functionality to Product Search results.

1. In the CMS, go to **Content Theme Layout**.
2. Scroll to **Zone: Content After** and click **Add Widget**.
3. Search for **Product Compare** and click **Add Widget**.
4. Click **Edit** on the widget to configure options. See: [Product Compare Widget](#).

[illegible]

5. To save the changes, click **Save**.

2. Add for Product List page

Complete this step to add product compare to a product list (category) page using the Product List Item Zoned template.

1. Go to **Content Pages & Templates**.
2. Select the **Product List Item Zoned** template.

3. Scroll to **Zone Footer** and click **Add Widget**.
4. Search for **Product List Compare** and click **Add**.

3. Refresh cache

1. Go to **Settings Cache Management**.
2. Clear **Product Cache**.

If both the dictionary and browser have been refreshed and the feature is still not displaying, check that the site is using Zoned Product Layout (most sites are configured this way by default).

1. Navigate to **Content Standard Pages** and select the **Product List** template. Edit the '**Product List Grid**' widget and ensure '**Use Zoned Product Layout**' & '**Use Zoned Category Layout**' are ticked. If not, tick and click **Save**.
