# Buy Now, Pay Later - Afterpay

Overview

Afterpay is a popular *Buy Now, Pay Later* option that Commerce Vision supports for BPD. Your customers can get their goods now, and pay for them over time in manageable installments.

Configuring Afterpay for your website is quick and easy, provided you have already established a merchant account with Afterpay. For further information see our comparison page, or visit Afterpay at https://www.afterpay.com/en-AU.
ⓘ **Prerequisite alert!**
Before you can begin offering Afterpay to your customers, your website must be running version 4.08+, and you'll need a merchant account with Afterpay. Contact our support team if you'd like to request a version upgrade for your site, or to be put in touch with our Afterpay account manager.

Step-by-step guide

1. Before you start, have your Afterpay account credentials handy.

2. In the CMS, navigate to **Settings Feature Management**.

3. Search for **Buy Now, Pay Later**, or select the **Payment & Checkout** tab.

Content	8	>	Feature	Options
Payment & Checkout	10	>	**Buy Now, Pay Later** Configure instalment payment options for your website.	⚙ Configure
Products & Categories	10	>	**Credit Card Verification** Configure options related to Credit Card Verification.	
System	6	>	**Fraud Protection - Short Charge Orders** Configure to short charge orders by a certain amount to verify credit card transaction and prevent fraud.	
User	5	>	**Guest Checkout** Configure options related to Guest Checkout.	⚙ Configure

4. Click '**Configure**' on the Buy Now, Pay Later feature. (If no Configure option is visible, click the 'Contact to Enable' button and our support team will be notified of your request.)

5. Scroll to the Afterpay configuration settings section.

6. Set the **Mode** based on whether you're configuring Afterpay for your **Live** site (**Production**), or **Stage** site (**Sandbox**).

Mode

Sandbox ▼

Overrides   0

7. Enter your **Merchant IDs** and **Secret Key** in the relevant fields (Production or Sandbox).

Overrides   0

8. Set the following options:
   - **Event Logging** - toggle this **ON** (recommended).
   - **Auto-Integrate Pending Orders** - integrates the orders to the ERP prior to receiving a response from Afterpay.

9. **Display Content in Product Detail** - toggle on to show the Afterpay logo & info on the product detail page, which launches a pop-up explaining the payment option.

10. Once all settings have been configured and you're ready to go, scroll back to the top, set the Afterpay status dropdown to **E nabled**, and **Save**.

Provider Selection
Specify the providers to use

AfterPay
Enabled

✅ Some other Buy Now, Pay Later payment providers ask that you specify the order and product $ values required to trigger their payment option at checkout. With Afterpay however, these values are set automatically, based on the terms of your merchant account and the user's borrowing power.

About Overrides

You can override any of the feature settings based on the user's role.

For example, you may wish to display the Afterpay info box on the Product Detail page for B2C users, but not for B2B. In this case, you could set an override.

1. Select the **'Overrides'** icon next to the setting you want to customise.

This setting can also be defined on Role level

Overrides   0

2. A popup will open, with your current Global setting displayed at the bottom. Click **Add Override Setting** in the Role Overrides section.

⚙ Setting Override: Display Content in Product Detail

ℹ About Overrides

❓ What Is The Override Hierarchy?   ❓ What Is The Global Setting?
