Campaign Slider Widget

Widget Use

Displays the products from a nominated Campaign in your chosen layout. Slider mode (default) is a traditional carousel in which product tiles scroll across the page. Alternatively, you can choose from Grid or List mode, both of which are static (no sliding behaviour).

Example of Widget Use

Following is an example of the widget in use:

Where can the Widget be placed?

The widget can be used in the following templates:

- All Templates

Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	We recommended this field be updated so the widget's purpose is clear at a glance from the template page.	All
Layer	The layer the widget is valid for.	The layering technology allows for the content to be shown to specific audiences. This is handy if the content is only valid for a certain type of user, or if the same widget is required for more than one audience, but different configuration is needed. The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.	All
Campaign	Determines which campaign will be displayed. Select the required campaign description from the drop-down list.	Drop-down list is populated with campaigns from Campaign Maintenance (/zCampaign.aspx).	All
List Title	The heading text displayed at the top of the campaign slider.		All
Title Icon	The icon displayed to the left of the List Title text.	Select via drop-down	All

Show Display Count With Title?	Determines whether a count is displayed under the List Title. E.g. If there are 8 products in the campaign and the slider is currently displaying numbers 2 through 6, the Display Count would read "Showing 2-6 of 8"	Default is: unticked	3.81
Max Number Of Products	The maximum number of products to be displayed in the slider. If the number of products in the campaign exceeds this number, the excess will simply not show.	Default is: 10	All
Use Zoned Product Layout?	Determines whether product tiles include information from the zoned product layout (which could include data such as RRP, availability, and unit of issue).	Default is: unticked	All
Show As List?	Displays the products in a tiled grid layout, but shows all of the products on page load, continuing on to multiple rows if required. With 'Show As List', the slider function is disabled.	Default is: unticked **Note** - this widget option is replaced by the 'Display Mode' selector on version 3.95+.	To 3.95
Show Products As List?	Displays the products in a list layout, rather than grid. With this view, the slider function is disabled as the user simply scrolls up/down the page to view products.	Default is: unticked **Note** - this widget option is replaced by the 'Display Mode' selector on version 3.95+.	To 3.95
Display Mode	Determines the layout in which campaign products are displayed on the page: • Slider • Grid • List	Default is: Slider	3.95
Show Next Previous Buttons?	Determines whether Next / Previous links are displayed on the left and right of the slider. Clicking these navigates through the campaign products one tile at a time. Only applies when products are NOT shown in list format.	Default is: unticked	3.81
Track Campaign?	Determines whether purchase and view statistics are captured for display in Campaign Maintenance.	Default is: unticked	
Hide Footer Zone?	Hides the campaign footer zone when 'Quick View' functionality is used with Live Pricing.	Default is: unticked	
Is Split Campaign?	Tick this option to split the display of one campaign's products over multiple Campaign Slider widgets.	Default is: unticked	3.95
