

Category Field List Widget

Widget Use

Outputs the data from any field in the category table.

Example of Widget Use

Following is an example of the widget in use:

Category Code

SX010101

Where can the Widget be placed?

The widget can be used in the following templates:

- [Product List Template](#)

Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	We recommend this field be updated so the widget's purpose is clear at a glance from the template page.	All
Layer	The layer the widget is valid for.	The layering technology allows for the content to be shown to specific audiences. This is handy if the content is only valid for a certain type of user or if the same widget is required for more than one audience but different configurations are needed. The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.	All
Category Field	The field from the category table to be displayed.	In the image above, the field is the category code and the output is 'SX010101' Select via drop-down	All
Show Heading?	Determines whether the 'Heading Text' is displayed.	Default: enabled Toggle to disable	All
Heading Text	The title text displayed above the field.	In the image above, the heading text is 'Category Code'	All
Fallback Information	Fallback content to be displayed when there is no category field data for this record.		All
Show On Mobile?	Determines whether the widget is displayed on a mobile device. If unticked, the category field will be hidden on mobile devices.	Default: enabled Toggle to disable	All
