Dashboard Widget

Widget Use
Displays the user's account pages and profile information in a tiled format.

Example of Widget Use

Where can the Widget be placed?

The widget can be used in the following templates:

- All Templates

Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	We recommend this field be updated so the widget's purpose is clear at a glance from the template page.	All
Layer	The layer the widget is valid for.	The layering technology allows for the content to be shown to specific audiences. This is handy if the content is only valid for a certain type of user, or if the same widget is required for more than one audience but different configuration are needed. The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.	All
Dashboard Menu Item Code	Determines which page tiles are displayed, based on the menu items (e.g. Order History, My Favourites, etc).	Default: THEME_BPDTHEME01_Dashboard	All
My Details Field Group	Specifies the JSON Field Group to use for the User Details tile.	Default: contact-details	All
My Preferences Field Group	Specifies the JSON Field Group to use for the My Preferences tile.	Default: my-preferences	All

Enable Postcode Validation	Determines whether postcode validation is used for address maintenance.	Default: enabled Toggle to disable	All
Show Company Name In Address	When ticked, allows the B2C user to update the Company name in the Billing and Delivery Address sections.	Default: disabled Toggle to enable	3.84
