Where can the Widget be placed?

The widget can be used in the following templates:

- Any Email Template

Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	We recommend this field be updated so the widget's purpose is clear at a glance from the template page.	All
Layer	The layer the widget is valid for.	<p>The layering technology allows for the content to be shown to specific audiences.</p> <p>This is handy if the content is only valid for a certain type of user, or if the same widget is required for more than one audience but different configurations are needed.</p> <p>The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.</p>	All
Body Background Colour	The Hex colour code for the background of the email body.	Default is: #FAFAFA (light grey / white)	All
Banner Background Colour	The Hex colour code for the background of the email banner.	Default is: #007ab2 (blue)	All
Footer Background Colour	The Hex colour code for the background of the email footer.	Default is: #f1f1f1 (grey)	All
Override Stylesheet	<p>For custom email styles, enter your CSS code here to override the defaults.</p> <p>As with the 3 options above, this override stylesheet code will automatically apply to all email templates using the Email Style Sheet widget.</p>		4.10
