

# Product Variant List Widget

(Formerly known as the Product Attribute List widget)

## Widget Use

Renders the list of product options (variants) on the product detail page. From here, the user can edit quantities and add to cart.

## Example of Widget Use

Following is an example of the widget in use:

Product Options

Blue	XLarge	\$28.49	<div><div></div><div>+</div><div>-</div></div>	\$0.00

\$119.96 ex GST

Add selected to cart

## Where can the Widget be placed?

The widget can be used in the following templates:

- Product Detail Template

## Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	We recommended this field be updated so the widget's purpose is clear at a glance from the template page.	All

Layer	The layer the widget is valid for.	<p>The <a href="#">layering technology</a> allows for the content to be shown to specific audiences.</p> <p>This is handy if the content is only valid for a certain type of user, or if the same widget is required for more than one audience, but different configuration is needed.</p> <p>The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.</p>	All
Show Heading?	Determines whether heading text is displayed at the top of the widget.	<p>Default is: ticked</p> <p>Untick to disable</p>	All
Show Toggle?	Determines whether the section can be expanded and collapsed by the user. The content is collapsed by default and expanded when the user clicks the toggle arrows.	<p>Default is: ticked</p> <p>Untick to disable</p>	All
Show Top Add Button?	Determines whether an Add To Cart button is displayed at the top of the grid.	<p>Default is: unticked</p> <p>Tick to show the add button at the top of the grid</p>	All
Show Bottom Add Button?	Determines whether an Add To Cart button is displayed at the bottom of the grid.	<p>Default is: ticked</p> <p>Untick to hide the bottom button</p>	All
Increase Quantities In Pack Qty?	Forces the value in the quantity field to increase/decrease in pack quantities when using the plus/minus icons, rather than by the default quantity of 1.	<p>Default is: unticked</p> <p>Tick to enable</p>	All
Add Minimum Quantity To Cart	Displays the minimum quantity of products into the cart.	<p>Default is: unticked</p> <p>Tick to enable</p>	4.13
Show RRP	Displays the RRP for each child product in the grid	<p>Default is: unticked</p> <p>Tick to enable</p>	4.13
Show Total?	Determines whether the 'Total ex GST' column is displayed.	<p>Default is: ticked</p> <p>Untick to hide this column</p>	3.99
Show Product Code?	Determines whether the child code is displayed in the grid.	<p>Default is: unticked</p> <p>Tick to display the child code</p>	3.99
Show Availability?	Determines whether stock availability for child codes is displayed in the grid.	<p>Default is: unticked</p> <p>Tick to display availability</p>	3.99
Use Role Flag to Hide Availability?	<p>Determines whether this widget obeys the '<b>Available Qty display</b>' role flag when "Show Availability" is enabled for the widget.</p> <p>With this option, you can tick 'Show Availability' on the widget, then hide it for certain roles by setting this field to 'None'.</p>	<p>Default is: unticked</p> <p>Tick to obey the role availability display setting</p>	3.99
Custom Availability Widget Name	<p>If your site uses custom availability, enter the name of your availability widget here. (You can find your site's custom widgets at <a href="#">Advanced Content Custom Widgets</a>.)</p> <p>Using a custom widget here overrides the 'Show Availability' and 'Use Role Flag To Hide Availability' settings on this widget, instead obeying the custom widget's logic.</p>		3.99

## Other Widgets

- [Order Payment Links Form Widget](#) — Renders an order details stepper with an order form that can be automatically populated with query strings, and/or manually entered by the user. The form doesn't validate the order details are accurate in order to stay both secure and accessible to unauthenticated users.
- [Magic Link Authentication Message Widget](#) — Renders the Magic Link authentication message.
- [CUSTOM\\_Side by Side Content Tiles Widget](#) — Renders two side by side content tiles in a zone with widget options for selecting or adding background colour, image, text and link/button positioning.
- [Stock Dialog Widget](#) — Displays the Stock to Receive Detail dialog window.
- [Stock to Receive Widget](#) — Displays the Stock to Receive page.
- [Stock Levels Widget](#) — Displays Stock Levels page.
- [Order Declined Pending 3rd Party Installment Msg Widget](#) — Renders the message body for the email sent when the user selects to sign up and pay with a Buy Now Pay Later provider but approval is subject to further checks.
- [Order Field Static Widget](#) — Renders an additional order field in email templates.
- [Online Quote Validation Widget](#) — Renders the appropriate message to the user after the current status of an online quote accessed via an email link is validated.
- [Header Level Cost Centre Widget](#) — Renders the cost centre input field on the order header in the shopping cart.

- [Openpay Summary Widget](#) — Renders Openpay marketing information for a product on the product detail page. Use this widget instead of the [Product Purchase Details widget](#) if you want to customise tagline placement on the template.
- [Order Line Availability - Click and Collect Widget](#) — Displays product availability and delivery methods at the order line level in dynamic scenarios such as the cart when Click & Collect is enabled.
- [Account Activation Email Content Widget](#) — Renders the message content in the Invitation to Register an Account email.
- [Order Template Cost Centre Widget](#) — **Renders the cost centre input field on each product line in an order template.**
- [BPAY Account Payment Detail Widget](#) — Renders BPAY payment information in the body of the BPAY Account Payment email. This email is sent to users who pay invoices or pay down their account balance using BPAY.
