

Recently Viewed Products Widget

Widget Use

Displays a list of products that the user has recently viewed on the website, allowing them to return quickly and easily to an earlier product selection.

Example of Widget Use

Recently Viewed

The screenshot shows a 'Recently Viewed' widget with four product cards. Each card contains the following information:

- Product 1:** Verbatim Store 'n' Save 3TB USB 3.0 Desktop Hard Drive. Code: CV405. Price: \$165.99. inc GST.
- Product 2:** Euro Style 3-Drawer Steel Mobile Pedestal. Code: CV343. Price: \$315.50. inc GST.
- Product 3:** PENN Championship Tennis Balls - 12-Pack. Code: CV118. Price: \$26.95. inc GST.
- Product 4:** Starter Acoustic Guitar. Code: CV174. Price: \$69.95. inc GST.

Each card also features a quantity selector (with '+' and '-' buttons) and a blue 'Add to cart' button.

Where can the Widget be placed?

The widget can be used in the following templates:

- Product Detail Template
- Product List Template

Widget Options

Option	Use	Comments	Available from Version
Description	The description of the widget	It is recommended to use this so the reason for use of the widget is seen from the template page	All
Layer	The layer that the widget will be shown on	The layering technology allows for the content to be shown to specific audiences. This is handy if the content is only valid for a certain type of user, or if the same widget is required for more than one audience, but different configuration is needed. The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.	All
Title	The text that is entered into this field is the text that will be displayed above the recently viewed products to inform the user that the listed products are recently viewed.	Default is: Recently Viewed	All

Hide When No Recently Viewed Products?	Determines whether the widget is hidden until the user has viewed a product.	Default is: unticked Tick to enable	3.90
Max Number Of Products	Determines the number of products that can be displayed in the recently viewed widget.	Default is: 4	All
Non Zoned Functions			
Show Image?	Determines whether the recently viewed product images are displayed or not. If Unticked, the product image will not be displayed.	Default is: ticked Untick to disable	All
Show Ribbons?	Determines whether the product ribbon is displayed over the image in the recently viewed section.	Default is: ticked Untick to disable	3.90
Show Description?	Determines whether the product description is displayed on the product grid in the recently viewed section.	Default is: ticked Untick to disable	All
Show Product Code?	Determines whether the product code is displayed on the product grid in the recently viewed section.	Default is: ticked Untick to disable	All
Show APN Instead Of Product Code	Determines whether the Australian Product Number is displayed in lieu of the product code. This setting only applies if 'Show Product Code' is enabled.	Default is: unticked Tick to enable	All
Show Pricing?	Determines if the price of the product is displayed on the product grid in the recently viewed section. If unticked the product price will not be displayed.	Default is: ticked Untick to disable	All
Show RRP?	Determines if the RRP of the product is displayed on the product grid in the recently viewed section. If unticked the product RRP will not be displayed.	Default is: unticked Tick to enable	All
RRP Prompt	The RRP prompt is the text that appears next to the RRP value to indicate to the user that the following value is the RRP.	Default is: RRP	All
Strip Zero Decimal Amounts?	When the price is an even dollar amount, the cents are stripped from the display. (For example, \$147.00 would be displayed as \$147)	Default is: unticked Tick to enable	3.88
Increase Quantities In Pack Qty?	This will make the values in the quantity box go up and down by pack quantity values when clicking on the plus and minus icons	Default is: unticked Tick to enable	All
Show Unit Description?	Determines if the unit description of the product is displayed on the product grid in the recently viewed section. If unticked the product unit description will not be displayed.	Default is: unticked Tick to enable	All
Show Availability?	Determines if the availability of the product is displayed on the product grid in the recently viewed section. If unticked the product availability will not be displayed.	Default is: unticked Tick to enable	All
In Stock Prompt	The Stock prompt is the text that appears to indicate to the user that the following product is the Stock.	Default is: In Stock	All
Out Of Stock Prompt	The out of stock prompt is the text that appears to indicate to the user that the following product is out of stock.	Default is: Out of Stock	All
Show Quantities?	Determines if the Quantity of the product is displayed on the product grid in the recently viewed section. If unticked the product Quantity will not be displayed.	Default is: unticked Tick to enable	All
Attributed Product Price Display	If one of the products in the recently viewed products has product attributes, this will determine which price to display for these products.	Default is: Default Functionality	All
Product URL Prefix	When clicking on products in the Recently Viewed Products, this field will add a string of text into the URL before the default URL of the product	Default is: null	All
Show Add To Cart?	Determines if the add to cart button is displayed on the product grid in the recently viewed section. If unticked the add to cart button will not be displayed.	Default is: ticked Untick to disable	All
Add To Cart Button Text	The Add to Cart Button Prompt is the text that appears in the add to cart button to indicate to the user that the button will add the product to cart.	Default is: Add to Cart	All
Show Add To Favourites?	Determines whether the add to favourites button is displayed for logged in users.	Default is: ticked Untick to disable	All
Zoned Functions			
Show Display Count With Title?	Determines whether the total and number of currently displayed products is shown under the heading text.	Default is: unticked Tick to enable	3.87

Show Next Previous Buttons?	Determines whether the Next and Previous product links are shown.	Default is: unticked Tick to enable	3.87

Implementation Guide

- [Recently Viewed Products](#)

Other Widgets

- [Order Payment Links Form Widget](#) — Renders an order details stepper with an order form that can be automatically populated with query strings, and/or manually entered by the user. The form doesn't validate the order details are accurate in order to stay both secure and accessible to unauthenticated users.
- [Magic Link Authentication Message Widget](#) — Renders the Magic Link authentication message.
- [CUSTOM_Side by Side Content Tiles Widget](#) — Renders two side by side content tiles in a zone with widget options for selecting or adding background colour, image, text and link/button positioning.
- [Stock Dialog Widget](#) — Displays the Stock to Receive Detail dialog window.
- [Stock to Receive Widget](#) — Displays the Stock to Receive page.
- [Stock Levels Widget](#) — Displays Stock Levels page.
- [Order Declined Pending 3rd Party Installment Msg Widget](#) — Renders the message body for the email sent when the user selects to sign up and pay with a Buy Now Pay Later provider but approval is subject to further checks.
- [Order Field Static Widget](#) — Renders an additional order field in email templates.
- [Online Quote Validation Widget](#) — Renders the appropriate message to the user after the current status of an online quote accessed via an email link is validated.
- [Header Level Cost Centre Widget](#) — Renders the cost centre input field on the order header in the shopping cart.
- [Openpay Summary Widget](#) — Renders Openpay marketing information for a product on the product detail page. Use this widget instead of the [Product Purchase Details widget](#) if you want to customise tagline placement on the template.
- [Order Line Availability - Click and Collect Widget](#) — Displays product availability and delivery methods at the order line level in dynamic scenarios such as the cart when Click & Collect is enabled.
- [Account Activation Email Content Widget](#) — Renders the message content in the Invitation to Register an Account email.
- [Order Template Cost Centre Widget](#) — Renders the cost centre input field on each product line in an order template.
- [BPAY Account Payment Detail Widget](#) — Renders BPAY payment information in the body of the BPAY Account Payment email. This email is sent to users who pay invoices or pay down their account balance using BPAY.
