Where can the Widget be placed?

The widget can be used in the following templates:

- Register Page Template

Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	We recommend this field be updated so the widget's purpose is clear at a glance from the template page.	All
Layer	The layer the widget is valid for.	<p>The layering technology allows for the content to be shown to specific audiences. This is handy if the content is only valid for a certain type of user or if the same widget is required for more than one audience but different configurations are needed.</p> <p>The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.</p>	All
Send Register Email	Determines whether the user will receive an email after registering an account	<p>Default: enabled</p> <p>Toggle to disable</p>	All

User Id Required As Email	<p>Determines whether the User ID must be in email format (eg someone@somewhere.com).</p> <ul style="list-style-type: none"> When ticked, the user's email address serves as their User ID and the 'Use Notify Email' option is disabled. When unticked, the User ID can be any value, and the 'Use Notify Email' option can be used to store the user's notification email address. 	<p>Default: enabled</p> <p>Toggle to disable</p>	All
Use Notify Email	Renders a field for the user to enter a notification email address for all communication from the website. This option is automatically enabled if the User ID is not required to be in email format.	<p>Default: enabled</p> <p>Toggle to disable</p>	All
Use Confirm Email	Renders the email address input box twice so that the user must enter it again as confirmation.	<p>Default: disabled</p> <p>Toggle to enable</p>	All
First Name Required	Determines whether the First Name is mandatory for registration.	<p>Default: enabled</p> <p>Toggle to disable</p>	All
Surname Required	Determines whether the Surname is mandatory for registration.	<p>Default: enabled</p> <p>Toggle to disable</p>	All
Show Phone Number	Renders the Phone Number field on the registration form.	<p>Default: enabled</p> <p>Toggle to disable</p>	All
Phone Number Required	Determines whether the Phone Number is mandatory for registration.	<p>Default: disabled</p> <p>Toggle to enable</p>	All
Prompt For Promo Material	<p>Renders a checkbox for the user to elect to receive promo material on registration.</p> <p>NOTE - A field must exist for this value in the 'B2CRegistration' field group.</p>	<p>Default: enabled</p> <p>Toggle to disable</p>	All
Show Terms and Conditions Checkbox	Renders a checkbox for the user to acknowledge and accept the site's Terms & Conditions.	<p>Default: disabled</p> <p>Toggle to enable</p>	All
Ticking Terms and Conditions Checkbox Required	Determines whether accepting the Terms & Conditions is mandatory for registration.	<p>Default: disabled</p> <p>Toggle to enable</p>	All
Show Validation Messages In Message Box	Determines whether an error message displays if the user attempts to register an account without entering valid content into mandatory fields. The error message will list the invalid fields.	<p>Default: enabled</p> <p>Toggle to disable</p>	All
Show Captcha for Registration	Determines whether a Captcha check is included in the register form.	<p>Default: enabled</p> <p>Toggle to disable</p>	All
Phone Number Regex	Tests entered phone numbers so ensure they are valid.	<p>Default: <code>/^0(2 3 4 7 8)d{8}\$/</code></p> <p>NOTE - this should normally not be edited.</p>	All
B2B Registration Completed Message	Text that is displayed when initial registration of a B2B user is complete.	Default: Thank you for registering. Please allow up to 48 business hours (during peak times) for your login to be validated and activated. A confirmation email of your registration has been sent to you. When your login has been fully activated another email will be sent to you with details on how to login and complete the registration process.	4.04
