

Mobile, Tablet, and Desktop display options

Overview

From version 4.15.00 onward, we have enhanced the "Show on Mobile?", "Show on Tablet?", and "Show on Desktop?" widget display options. When you toggle one or more of the "Show On" device type displays to OFF, the icons will display on the widget in the template page to indicate what devices will display (or not) that widget's content.

The screenshot displays the configuration interface for a "Questionnaire - Contact Us" widget. On the left is a sidebar with navigation links: "Search...", "General Options", "Personalisation", "Captchas", "Common Options" (which is highlighted in blue), and "Documentation". The main area is titled "Common Options" and contains several settings:

- Show On Mobile?**: A toggle switch currently set to OFF (grey).
- Show On Tablet?**: A toggle switch currently set to ON (green).
- Show On Desktop?**: A toggle switch currently set to ON (green).
- Right Align?**: A toggle switch currently set to OFF (grey).
- Don't Print**: A toggle switch currently set to OFF (grey).
- Additional Classes**: A text input field with a help icon and the text: "For example, you can add a style sheet class of 'new-class' which will then appear next to the widget class".

Below the configuration area is a widget preview section labeled "Zone: BottomRightThird". It shows a preview of the "Questionnaire - Contact Us" widget. At the bottom of the preview, there are three device icons: a mobile phone, a tablet, and a desktop monitor. The mobile phone icon is highlighted with a red box, and a red arrow points from the "Show On Mobile?" toggle in the configuration area to this icon. To the right of the icons are "Edit" and "Options" buttons.

Change to Banner Sliders

In the case of Banner sliders, we realise that you may not want the same image to display on all device types, or even at all. Perhaps an image doesn't render well on mobile devices.

Therefore, you can find the same Desktop, Mobile, and Tablet display options in each individual banner file in Banner Maintenance, updated to show you how the image will appear on the relevant device.

Refer to the [Widget Device Display Indication: Mobile, Tablet, and Desktop](#) knowledge base article for more information.

Minimum Version Requirements	4.15
Prerequisites	--
Self Configurable	Yes
Business Function	Site Optimisation
BPD Only?	Yes
B2B/B2C/Both	Both
Third Party Costs	n/a
