

New Promo Code scenario

We've added another promo code scenario to the CMS toolkit! Now, you can offer a product at a discounted price when your customer buys a specific quantity of another product.

If you've ever ordered 2 pizzas online and been offered garlic bread for \$1, you'll know how this one works. 👍

If you'd like a run-through, check out our document here - [Buy X Quantity of a Product and Get Y Quantity of Specific Product at Special Price](#).
