

Back In Stock Notifications

Overview

The 'Notify Me' functionality lets users request an email when a currently out of stock product becomes available. It displays in the cart.

2. In the popup, they enter their email address.

A modal dialog box titled "Stock Availability Notification" with a blue header bar containing a close button (X). The dialog has a white background. It contains two input fields: "Product codes" with the value "CV343" and "Notification Email Address" with the value "katie.koss@commercevision.com.au". The email field has a red asterisk indicating it is required. At the bottom, there are two buttons: a red "Cancel" button with a minus icon and a green "Confirm" button with a checkmark icon.

Stock Availability Notification

Product codes

CV343

Notification Email Address *

katie.koss@commercevision.com.au

Cancel Confirm

3. When this notification request has been confirmed, the product is automatically removed from the cart.

4. A scheduled task regularly checks stock availability against notification requests. When the product becomes available, the notification email is sent.

Step-by-step guide

1. Add the Widgets

Shopping Cart:

1. In the CMS, go to **Content Content Pages and Templates**.
2. Select the **Checkout Cart**.

3. Click **Edit** button.

The screenshot shows the 'Pages & Templates' management interface. On the left, there's a sidebar with a list of templates: My Favourites, Accounts, Articles, Checkout (highlighted), Orders, Products, Custom Pages, Theme Layout, and Other Pages & Templates. The main area displays a list of templates with columns for Name and Options. The 'Cart' template is highlighted, and its 'Edit' button is circled in red.

4. Click **Add Widget** in any zone (for example Zone Header Right). The feature will behave the same regardless of zone placement.

5. Search for and select the '**Stock Availability Popup**' widget and click **Add Widget**.

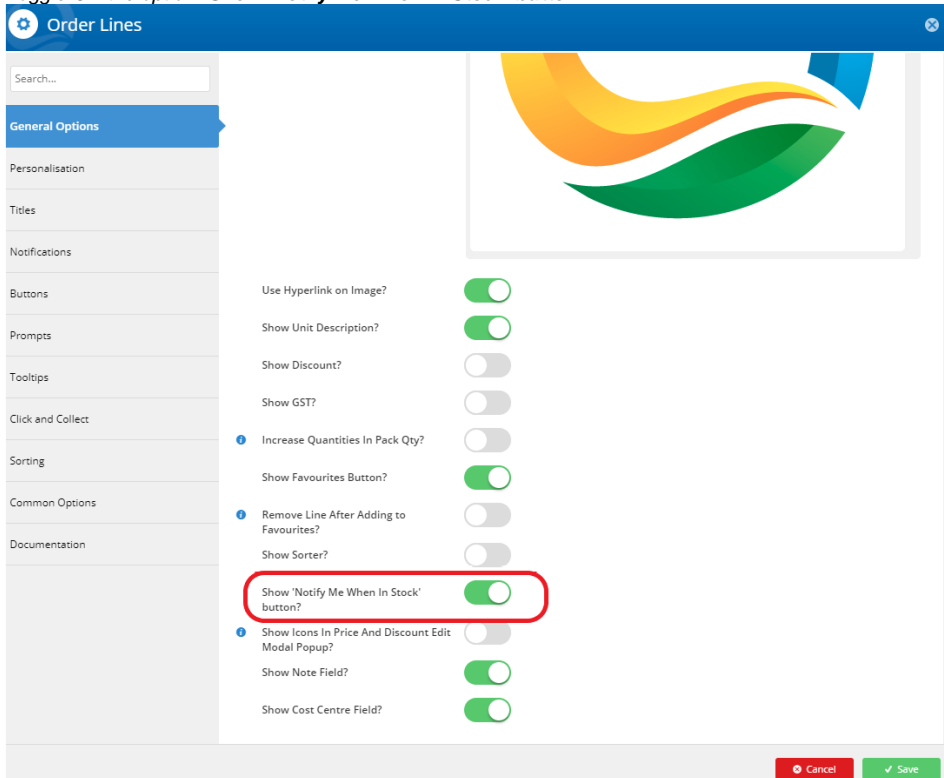

The screenshot shows the 'Add New Widget' interface. The search bar contains the text 'stock'. Below the search bar, there's a list of widgets: Notify Me When In Stock Button, Notify Me When In Stock Popup (highlighted), and Stock Availability List. The 'Notify Me When In Stock Popup' widget is highlighted, and its 'Add Widget' button is circled in red.

6. Click **Edit** to configure options.

7. Update messages (optional) and click **Save**.

8. Still in the Cart template, locate the **Order Lines** widget and click **Edit**.

9. Toggle ON the option "Show 'Notify Me When In Stock' button".

10. Edit the Notify Me button label (on the 'Buttons' tab) if required.

11. Click **Save**.

2. Create & Assign the Email Template

1. Go to **Content** **Content** **Emails**.

2. Choose **Misc** **Stock Availability Notify**.

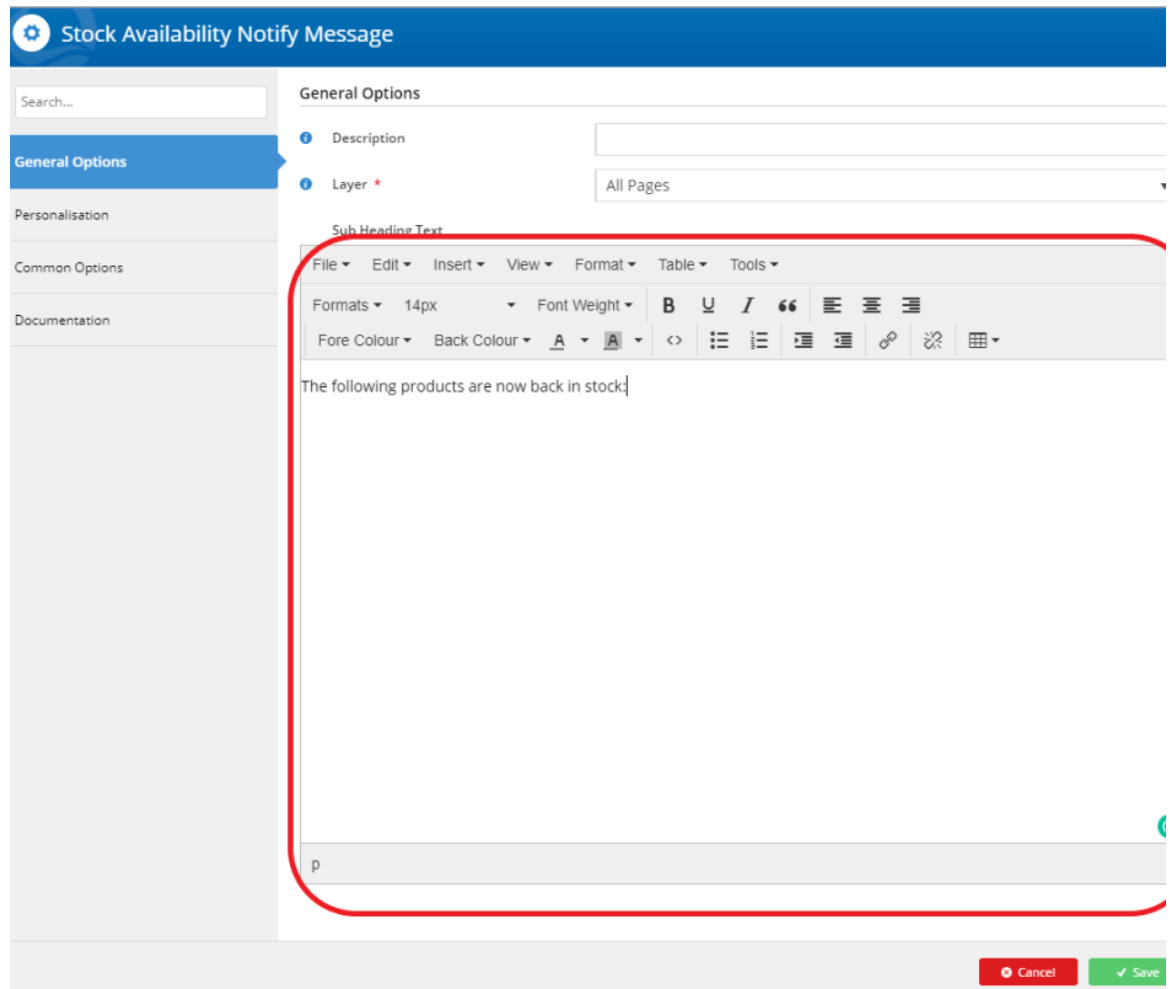

3. Click **Edit** button.

4. Search for the widget name **Stock Availability Notify Message**.

5. Click **Edit** button.

6. Under the General Options, you may start working with your text template on the **Sub Header Text** section.

Additional Information

For best practice configuration – back in stock notifications are best used on the product detail page. In most cases we will not add these to the Product List item zoned as this can interfere with a customer's usual browsing behaviour and the click through rate of the product. If the customer is alerted of the back in stock notification or out of stock condition of an item they are less likely to click through to the product to find out more about the item.

If this happens, from an analytics perspective it makes it very hard to understand the demand of an item and if higher SOH values would lead to increased sales or not. --

--	--

Minimum Version Requirements	4.13
Prerequisites	--
Self Configurable	Yes
Business Function	Ordering
BPD Only?	Yes
B2B/B2C/Both	Both
Third Party Costs	n/a
