Widget Options

General	Use	Comments	Available from Version
Description	A short description of the widget's use.	We recommend this field be updated so the widget's purpose is clear at a glance from the template page.	All
Layer	The layer the widget is valid for.	The layering technology allows for the content to be shown to specific audiences. This is handy if the content is only valid for a certain type of user or if the same widget is required for more than one audience but different configurations are needed. The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.	All
Show Unit Description?	Determines whether the unit of issue column is included.	Default: ON Toggle to disable	All
Show Discount?	Determines whether a separate discount column (for certain discounts) is included.	Default: ON Toggle to disable	All
Show GST?	Determines whether a separate GST column is included.	Default: OFF Toggle to enable	All

Show Note Lines on Individual Lines?	When enabled, displays the user-entered note lines in 30-character blocks on individual lines (as they would appear once integrated to PRONTO). Default behaviour is to show note lines as the user enters them in the cart, with 30-character blocks concatenated to one line.	Default: OFF Toggle to enable	3.78
Show Order Summary	Determines whether the dollar totals section of the order is rendered in email output. When enabled, all fields will show. When disabled, the summary fields (Subtotal, Freight, GST, Total, etc) will be hidden.	Default: ON Toggle to disable	3.88
Show Image?	Determines whether product images of items purchased are included.	Default: ON Toggle to disable	All
Show Rejected Order Lines?	Determines whether the rejected order lines should be included. This flag is used when the widget is on the Order Rejected Email template.	Default: OFF Toggle to enable	3.90

Show Freight Lines on Individual Lines?	Determines whether the charges summary on the email displays simply 'Freight' for the single freight charge line, or uses the system description (and shows multiple charge lines, where applicable).	Default: OFF Toggle to enable	3.91																																		
Show Backorder Information?	Determines whether a separate column displaying details of backordered products is included.	Default: OFF NOTE - For 4.31+ . When this setting is ON for the confirmation email, after stock validation from your ERP, backordered products/quantities are displayed separately to those that will be shipped.
