

Export Cart to Excel

How many of your customers don't checkout immediately once they reach cart? Or need a record of items for their manager? Give your users the option to have a record of their cart's contents before purchasing. The Add an Export to Excel button allows users to have their cart contents emailed to them in an Excel file. The out-of-the-box solution provides a default Excel template that can include a product image.

Refer to the [Export Cart to Excel](#) help page for more information.
