Braintree Google Pay Settings

> ⓘ **Braintree Payments**
>
> Refer to the [documentation](#) on Braintree Payments for other help topics.

CV ecommerce Braintree Payments gateway is integrated to accept Google Pay. Google Pay allows users to make contactless payments online and with Android phones, tablets or watches. Your business must have a Google Pay account set up and Google Pay must be enabled in your Braintree account.

NOTE - Google Pay is available in Google Chrome v61 or higher on Android. If Google Pay is not supported by the customer's browser, the option to select Google Pay will not appear.
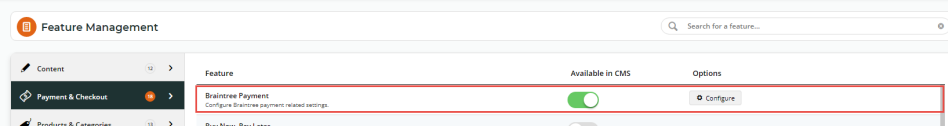

> ⓘ **Sandbox testing**
>
> For Sandbox testing, Google Pay requires a real credit card. However, no funds will be taken from the card during processing and the card is not saved.

Configure Google Pay Settings

To configure Braintree Google Pay Settings:

1. Navigate to **Settings Payment & Checkout Braintree Payment**.

2. If the **Available in CMS** toggle is not enabled, toggle it ON.

3. Click **Configure**.

4. Scroll down to **Google Pay Settings**.

5. Toggle ON **Enable Google Pay**.

6. In **Google Pay Merchant ID**, enter your Google Merchant ID from your Google Merchant Centre account. **TIP -** if you are testing in Sandbox, this can be left blank.

7. To save your settings, click **Save**.

> ⓘ ***When Google Pay is enabled on your site...***
>
> *In the Payments panel during checkout, 'Google Pay' displays as an option under Payment Methods.*

The User clicks on Google Pay and a Google Pay button is displayed.

The User clicks the Google Pay button to login to their Google account.
