

# Displaying Kit Components

## Overview

Kit items are defined in the ERP by an Item Type 'K' and a Bill Of Materials (BOM). The BOM is the list of all the items which make up that kit. It's often beneficial to list the components of a kit on your website, especially if they are not detailed in the product description. A Kit Component Display widget is available to list the components / BOM on the product detail page. This guide details its implementation.

## Classroom Percussion Kit, 25 Players

Product Code: CV900

\$1068.87 inc GST

### Kit Components

Code	Item	Qty
CV172	Bongos	5
CV173	Cymbals	5
CV175	Tuned Handbell Set	5
CV177	Triangle	5
CV178	Metal Kazoo	5

## Step-by-step guide

1. Login to the CMS.
2. Navigate to **Content** --> **Standard Pages**.
3. Select the **Product Detail** template.
4. Locate the appropriate zone (based on your layout), and click **'Add Widget'**.

5. Search for the **'Kit Component Display'** widget and click **'Add Widget'**.
6. Click **'Edit'** on the widget you just added.

7. Toggle options on/off and update column headings as required. Fields are documented [here](#), and are initially set to their default values.

Widget Configuration - Kit Component Display
✕

? Description

? Layer

? Show Product Code?

? Show APN Instead Of Product Code?

? Show Product Description?

? Show Product Quantity?

? Quantity Format

Show On Mobile?

^ Titles

Heading

? Product Code/APN Title

? Product Description Title

? Product Quantity Title

8. Click 'Save'!

9. In another browser or incognito window, launch your website.

10. Navigate to a kit product and verify that the components are listed and displaying as expected.

Congratulations - your Kit Component Display widget is now implemented!
