Overview

When a user edit product quantities, notes or cost centre details in the shopping cart, changes are automatically saved, and total cost as well as other affected totals such as GST will dynamically update. This saves the user from having to manually update these changes.

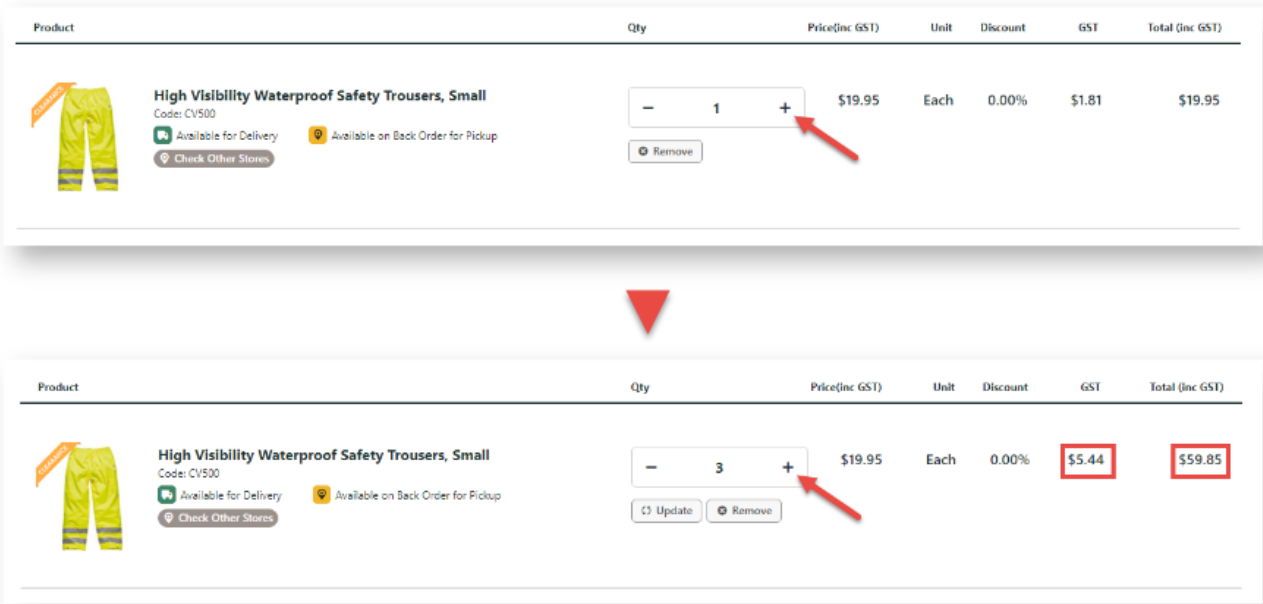

Without dynamic update

After updating quantities, the user clicks Update Order.

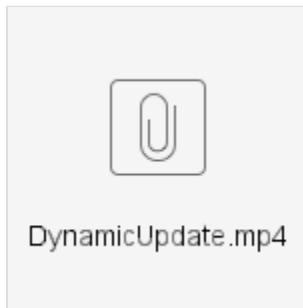

With dynamic update

The Update Order button is not displayed. Totals are automatically updated after any quantity changes.

How it works

Once enabled, updates are automatic. The Update Order button is hidden.

Additional Information

| | |
|-------------------------------------|--------------------|
| Minimum Version Requirements | 4.37 |
| Prerequisites | -- |
| Self Configurable | No |
| Business Function | Ordering Functions |
