PRONTO - Data Integration Guide

Overview

The c4cssmt PRONTO program allows for the maintenance of product and category data online. Each change made in this module will require a particular 'Send' event in the Commerce Vision integrator before the changes are visible on the website.

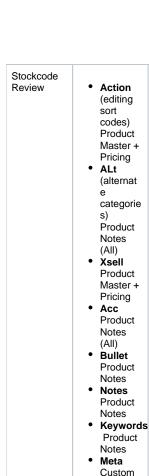

This guide outlines what to integrate when various modules are edited.

	Last Sent (Timings)	Last Sent (Manual)	Next Send (Changed)	Next Send (All)	Status	Send Now	Manual Send
Customer Master:	08-08-16 10:00 AM	07-01-16 12:20 PM	08-08-16 02:00 PM			All Changed

Note - send 'Product Categories' if you've added or removed a category, edited the category name, or changed the sequence.

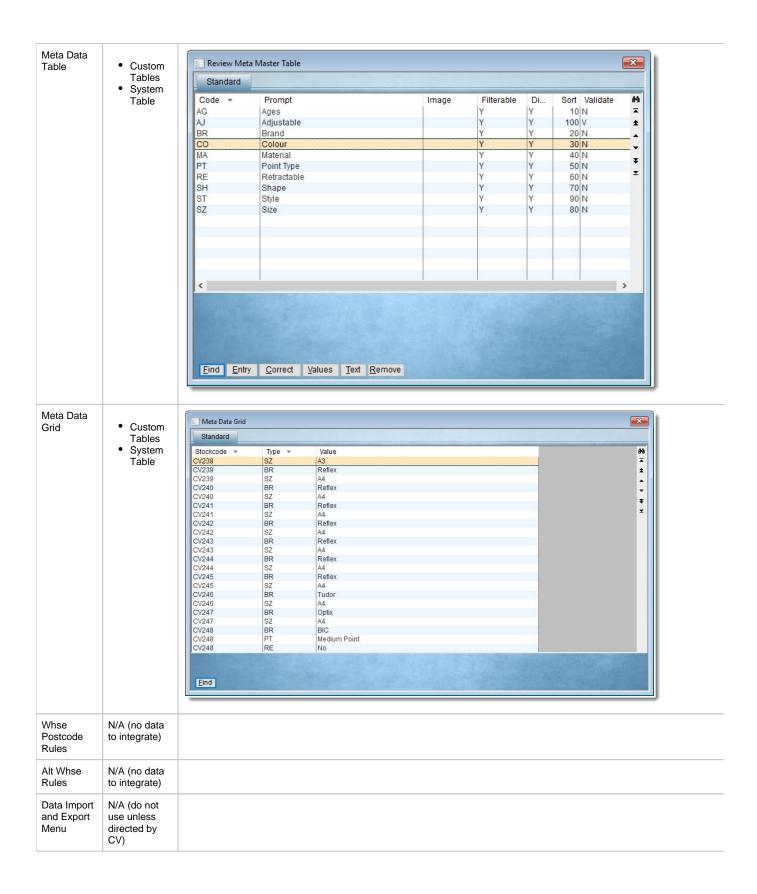

If you've drilled down to product level and made changes to products, follow the guide for the 'Stockcode Review' menu (above).
