Catalogue Widgets

- [Catalogue Select Widget](#) — Provides access to the user's valid catalogues, with a drop-down selector to switch between them.
- [Cluster Category Widget Library](#)
  - [Cluster Line Is Compulsory Widget](#) — Renders an icon and text to indicate compulsory products in a cluster.
  - [Cluster Line Suggested Qty Widget](#) — Renders a prompt plus numeric value to indicate the suggested purchase quantity for products in a cluster.
  - [Hotspot Image Widget](#) — Renders the hotspot banner in a cluster category. When a user clicks on a product image on the banner, they are taken to the product on the cluster page.
- [Product Category Widget Library](#)
  - [Category Field List Widget](#) — Outputs the data from any field in the category table.
  - [Category List Category Title Widget](#) — Displays the title of each category in the list. The title can be hyperlinked to the product category, or displayed as plain text only.
  - [Category List Image Widget](#) — Displays the image for each category in the list. The image can be hyperlinked to the product category or static only.
  - [Sub Category List Widget](#) — Renders a list of subcategories for the selected parent category. The user can select an item on the list to drill down to the required category level.
  - [Subcategory Top Products Widget](#) — Renders a subset of products in a campaign slider format for each category level. The product list is updated regularly via a stored procedure, and requires custom implementation.
- [Product Widgets](#)
  - [Alternates Popup Widget](#) — Used in alternate product substitution functionality to render a popup window with alternate products when the User clicks a 'Show Alternates' button in the Cart.
  - [Clear Favourites Widget](#) — Renders a button via which the user can clear all current products from their favourites list.
  - [Cross Sell / Up Sell Widget](#) — Displays a product's cross-sell or up-sell products on the product detail page. Cross-well encourages sales of accessory products. Up-sell suggests more upmarket alternatives to the product being viewed.
  - [Kit Component Display Widget](#) — Displays component information (or 'Bill of Materials') for kit-based products.
  - [Most Popular Products Widget](#) — Renders a list of 'most popular' products on any product list page. The list content is populated via Baynote algorithms, meaning a Baynote account and export template must be in place prior to implementation.
  - [Populate Favourites Widget](#) — Renders a button via which the user can populate their favourites list with prior purchases.
  - [Product Add To Cart Widget](#) — Renders the 'Add To Cart' button on the product detail page. This widget is used instead of (or possibly in addition to) the Product Purchase Details widget, to allow for customisation of button placement on the page.
  - [Product Availability Widget](#) — Renders stock availability status (text and icon) on the product detail page. This widget is used instead of (or possibly in addition to) the Product Purchase Details widget, to allow for customisation of placement on the page.
  - [Product Bonus Stock Widget](#) — Displays information regarding free bonus items on the product detail page (for applicable roles).
  - [Product Click And Collect Widget](#) — Displays the availability of the product on the product detail page. This widget is intended for sites with Click and Collect functionality implemented, and should be used in lieu of the standard 'Product Availability' widget.
  - [Product Compare Widget](#) — Renders the product comparison grid for Product search results.
  - [Product Cost Centre Widget](#) — Renders the Cost Centre label, help text, and input field on the product detail page. This widget is used instead of the Product Purchase Details widget, to allow for customisation of placement on the page.
  - [Product Detail Download Button Widget](#) — Renders the 'Download' button on the product detail page for products where 'Allow Download' has been enabled. On click of the button, a new tab / window is launched with the URL of the linked document file.
  - [Product Documents Widget](#) — Renders the document list and download links on the product detail page.
  - [Product Favourite Button Widget](#) — Renders the 'Favourite' button on the product detail page for logged in users. Use of this widget replaces the 'Show Favourites Button?' flag on the Product Purchase Details widget.
  - [Product Field Widget](#) — Outputs the data from a field in the product table.
  - [Product Gallery Widget](#) — Renders the product gallery, which can include images as well as videos.
  - [Product Item Widget](#) — Renders product information in a Product List page. The Product Item widget is employed where 'zoned' product layout is not in use.
  - [Product Notes Widget](#) — Renders the note input field on the product detail page. This widget is used instead of the Product Purchase Details widget, to allow for customisation of placement on the page.
  - [Product PDF Download Widget](#) — Renders a download button that lets user download a customised version of the product detail page.
  - [Product Price Ex Widget](#) — Renders the ex-tax price on the product detail page when the Tax Toggle is in use. Pair this widget with the Product Price Inc widget on the Product Detail template.
  - [Product Price Inc Widget](#) — Renders the inc-tax price on the product detail page when the Tax Toggle is in use. Pair this widget with the Product Price Ex widget on the Product Detail template.
  - [Product Price Widget](#) — Renders the product price on the product detail page. This widget is used instead of the Product Purchase Details widget http://cvconnect.commercevision.com.au/display/KB/Product+Purchase+Details+Widget, to allow for customisation of placement on the page.
  - [Product Purchase Details Widget](#) — Renders the purchasing details for a product, such as price, availability, and quantity in cart, as well as the Add to Cart and Add to Favourites buttons.
  - [Product Qty Box Widget](#) — Renders the quantity input box with plus & minus buttons on the product detail page. This widget is used instead of (or possibly in addition to) the Product Purchase Details widget http://cvconnect.commercevision.com.au/display/KB/Product+Purchase+Details+Widget, to allow for customisation of placement on the page.
  - [Product Qty On Back Order Widget](#) — Displays the quantity of product currently on backorder for the logged in customer. This widget is used on the product detail page instead of the Product Purchase Details widget http://cvconnect.commercevision.com.au/display/KB/Product+Purchase+Details+Widget, allowing for customisation of placement on the page.
  - [Product Quantity Breaks Widget](#) — Renders Quantity Break data on the product detail page. Use of this widget replaces the 'Show Quantity Breaks?' flag on the Product Purchase Details widget. With this widget, the placement of quantity breaks on the page can be customised.
  - [Product Quantity In Cart Widget](#) — Renders the quantity currently in the user's cart on the product detail page. This widget is used instead of the Product Purchase Details widget http://cvconnect.commercevision.com.au/display/KB/Product+Purchase+Details+Widget, to allow for customisation of placement on the page.
  - [Product Quick View Popup Widget](#) — Renders the 'Quick View' button on products in a list. Clicking the Quick View button launches a pop-up with product detail and an add to cart button. (Pop-up content is widget-based and configurable).
  - [Product Rating Widget](#) — Displays a product's current star rating, along with links for the user to read and write reviews. Please Note - this widget should be implemented in conjunction with the Product Reviews widget.
  - [Product Reviews Widget](#) — Displays a product's current reviews, along with a link for the user to submit a new review.

- Product RRP Ex Widget — Renders the RRP ex-tax price on the product detail page when the Tax Toggle is in use. Pair this widget with the Product RRP Inc widget on the Product Detail template.
- Product RRP Inc Widget — Renders the RRP inc-tax price on the product detail page when the Tax Toggle is in use. Pair this widget with the Product RRP Ex widget on the Product Detail template.
- Product RRP Widget — Renders the product's RRP on the product detail page. Use of this widget replaces the 'Show RRP?' flag on the Product Purchase Details widget. Using the Product RRP widget, the placement of RRP data on the page can be customised.
- Product Subscription Card Information — Renders content about product subscription credit card information.
- Product Subscription Expired Widget — Renders content for Product Subscription Expired email.
- Product Subscription Expiring Widget — Renders content for Product Subscription Expiring email.
- Product Subscription Purchased Widget — Renders content for the Product Subscription Purchased email.
- Product Subscription Renewal Failed Widget — Renders content for the Product Subscription Purchased email.
- Product Subscription Renewed Widget — Renders content for the Product Subscription Renewed email.
- Product Technical Specifications Widget — Outputs technical specification data, which is drawn from the product's metadata. If you maintain your metadata in the CMS, this refers to Product Features https://cvconnect.commercevision.com.au/pages/viewpage.action?pageId=25264411 data.
- Product Title Widget — Renders the product title and subtitle. Usually placed at the top of the page, in the Title zone.
- Product Unit Of Measure Widget — Renders a unit of measure selector on the product detail page so the user can switch between available pack quantities, where applicable. This is used in scenarios where the same product is sold in varying units (e.g. available as Each or in a Carton).
- Product Variant Grid Widget — Renders 2-dimensional style / colour / size options for a product in a compact grid layout, instead of using the Product Attribute List display method. With the attribute grid, options are presented in a matrix where the user can enter quantities against multiple options and add their selections to the cart.
- Product Variant List Widget — Renders the list of product options (variants) on the product detail page. From here, the user can edit quantities and add to cart.
- Product Variants Widget — Renders the dropdown list / radio buttons for users to select variant options on the product detail page. This widget is used instead of (or possibly in addition to) the Product Purchase Details widget, to allow for customisation of placement on the page.
- Product Video Widget — Displays a video on the product detail page, outside of the image gallery. The video is added to the product in Product Maintenance, and displayed by this widget on the product detail page.
- Recently Viewed Products Widget — Displays a list of products that the user has recently viewed on the website, allowing them to return quickly and easily to an earlier product selection.
- Refurbished Products Widget — Renders a collapsible section on the Product Detail page where refurbished products can be listed. These are generally products that have been returned or have open packaging, and are sold at a reduced price compared to their new counterpart.
