

# Order Payment Links Form Widget

## Widget Use

Renders an order details stepper with an order form that can be automatically populated with query strings, and/or manually entered by the user. The form doesn't validate the order details are accurate in order to stay both secure and accessible to unauthenticated users.

## Example of Widget Use

Following is an example of the widget in use:

🏠 Home > Order Payment

1

Enter Order Details

2

Enter Payment Details

3

Order Payment Outcome

Order Number \*

Amount (\$) \*

0

Customer Code \*

Email Address

✓ Confirm Details & Continue

## Where can the Widget be placed?

The widget can be used in the following templates:

- Order Payment Links Template

## Widget Options

Options	Use	Comments	Available from Version
Description	A short description of the widget's use.	We recommend this field be updated so the widget's purpose is clear at a glance from the template page.	All
Layer	The layer the widget is valid for.	The <a href="#">layering technology</a> allows for the content to be shown to specific audiences.  This is handy if the content is only valid for a certain type of user, or if the same widget is required for more than one audience but different configurations are needed.  The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.	All
Step One Title Label	Title text displayed above the order details form	Default: Enter Order Details (Step 1/3)	4.40
Step Two Title Label	Title text displayed above the payment details form	Default: Enter Payment Details (Step 2/3)	4.40
