

Subcategory Top Products Widget

(Formerly known as the ProductCategory Product Summary widget)

Widget Use

Renders a subset of products in a campaign slider format for each category level. The product list is updated regularly via a stored procedure, and requires custom implementation.

Example of Widget Use

In this example, each green circled area shows the category summary for a subcategory of 'Safety & First Aid'.

Safety & First Aid

Whether you are a small or large business, our range of Safety and First Aid Supplies can help you keep your workplace and employees safe. From [first aid kits](#), protective wear and apparel to [safety glasses](#), [high vis clothing](#) and survival kits, we've got the right products to help you get sorted. We also stock a range of civil defence products to ensure you have the essential items to assist survival in the event of disaster.

Where can the Widget be placed?

- [Product List Template](#)

Widget Options

Option	Use	Comments	Available from Version
--------	-----	----------	------------------------

Description	A short description of the widget's use.	This description is added to the widget title. It makes the widget's use clear on the template page.	All
Layer	The layer the widget is valid for.	Use layering to limit widget content to certain groups of users. To use the same widget for more than one user group but with different options set, add the widget as many times as needed in the same zone. Then add layering to define the user group each time.	All
View All Label	The text for the link to all products in the category.	Default is: View All	3.87
Show As List?	Determines whether the products are to be displayed in a tiled list format, rather than as a slider. If ticked, the products are laid out in list format and the slider is disabled.	Default is: unticked Tick to enable	3.87
Show Next /Previous Buttons?	Determines whether Next / Previous links are displayed on the left and right of the slider. Clicking these navigates through the campaign products one tile at a time. Only applies when products are NOT shown in list format.	Default is: unticked Tick to enable	3.88
Max Number of Products Per Category	Allows you to set the maximum number of products to be displayed per category heading. Blank or 0 = show all.		3.88

Other Widgets

- [Order Payment Links Form Widget](#) — Renders an order details stepper with an order form that can be automatically populated with query strings, and/or manually entered by the user. The form doesn't validate the order details are accurate in order to stay both secure and accessible to unauthenticated users.
- [Magic Link Authentication Message Widget](#) — Renders the Magic Link authentication message.
- [CUSTOM_Side by Side Content Tiles Widget](#) — Renders two side by side content tiles in a zone with widget options for selecting or adding background colour, image, text and link/button positioning.
- [Stock Dialog Widget](#) — Displays the Stock to Receive Detail dialog window.
- [Stock to Receive Widget](#) — Displays the Stock to Receive page.
- [Stock Levels Widget](#) — Displays Stock Levels page.
- [Order Declined Pending 3rd Party Installment Msg Widget](#) — Renders the message body for the email sent when the user selects to sign up and pay with a Buy Now Pay Later provider but approval is subject to further checks.
- [Order Field Static Widget](#) — Renders an additional order field in email templates.
- [Online Quote Validation Widget](#) — Renders the appropriate message to the user after the current status of an online quote accessed via an email link is validated.
- [Header Level Cost Centre Widget](#) — Renders the cost centre input field on the order header in the shopping cart.
- [Openpay Summary Widget](#) — Renders Openpay marketing information for a product on the product detail page. Use this widget instead of the [Product Purchase Details widget](#) if you want to customise tagline placement on the template.
- [Order Line Availability - Click and Collect Widget](#) — Displays product availability and delivery methods at the order line level in dynamic scenarios such as the cart when Click & Collect is enabled.
- [Account Activation Email Content Widget](#) — Renders the message content in the Invitation to Register an Account email.
- [Order Template Cost Centre Widget](#) — Renders the cost centre input field on each product line in an order template.
- [BPAY Account Payment Detail Widget](#) — Renders BPAY payment information in the body of the BPAY Account Payment email. This email is sent to users who pay invoices or pay down their account balance using BPAY.
