Where can the Widget be placed?

The widget can be used in the following templates:

- User Impersonation Select Page

Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	We recommend this field be updated so the widget's purpose is clear at a glance from the template page.	All
Layer	The layer the widget is valid for.	<p>The layering technology allows for the content to be shown to specific audiences.</p> <p>This is handy if the content is only valid for a certain type of user, or if the same widget is required for more than one audience, but different configuration is needed.</p> <p>The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.</p>	All
Account Search Placeholder	The placeholder text found in the search bar	The should give context to the user as to what types of data they can search reference when searching through users	All
User Email Title	The title of the email column in the results table		All

User First Name Title	The title of the First Name column in the results table		All
User Surname Title	The title of the Surname column in the results table		All
Default Redirect Home?	Upon impersonation redirect to home		All
Use Role Based Redirect?	Upon impersonation consider roles for redirect path as defined in AccountSelectPageRedirect on the role		All
Also show users the logged in user is a rep for?	Extend the list of results to also include users that are linked to the authenticated user by rep code		Available in version 4.41 +
Switching User Processing Label			All
