Custom Pages

Overview

Static content pages are an essential part of your website. There are customer service pages for FAQs and return policies, marketing pages for promotions and blog posts, product and sizing guides... The possibilities are endless!

When your Commerce Visio site was implemented, we started you off with a few classic hits such as 'Terms & Conditions' or 'About Us'. But you can create new and exciting pages yourself and link them to a menu in the CMS.

6. Users access pages via menus. In the Add to a Menu section, you must add the page to at least one menu. The menu can be an existing one or you can create a new menu here.

In **Menu Type**, select 'Section Menu' or 'Navigation Menu' to filter the menus in dropdown list. **NOTE** - To select a Section Menu, the <u>Menu Editor</u> feature must be enabled for your site.

Menu Type:

O Section Menu Navigation Menu

Your Commerce Vision website has two types of menus:

- the navigation menu usually for products and categories
- section menus for content pages

A standard ecommerce website typically has only one main navigation menu. But it probably will have a few section menus in various places. For example, your site's footer is likely to have more than one section menus, e.g., an 'Our Store' and 'Need Help?'.

7. Use Step (7a) if you want to link the page to an existing section menu. Use Step (7b) if you want to create a new section menu. Go straight to Step 8 to add to a navigation menu.

a. Select an existing menu.

NOTE - The blue text bubbles next to a menu show existing access restrictions for menu. Once you have selected a menu, you can add or remove restrictions.

Menu:
Dashboard CSSACC CSS CSSORD PUBLIC
Feature Nav CSSACC CSS CSSORD (PUBLIC)
Footer 1 CSSACC CSS CSSORD (PUBLIC)
Footer 2 CSSACC CSS CSSORD (PUBLIC)
Navigation (CSSACC) (CSS (CSSORD) (CSSADMINUSER) (CSSADMIN) (PUBLIC)

i. (optional) If you chose to add this page to an existing menu and want to add or remove existing role restrictions, hover on **Options** and select **Menu Associations**. Toggle ON each **Role** that should has access to this menu, then click **Confirm**.

			🤨 Edit Me	enu Assignments: Footer 2

15. Repeat steps 6-15 for another menu this page is linked from.

16. In the Page Content section, select Simple or Widget Based:

 Simple - page content is added via the WYSIWYG (What You See Is What You Get) content editor you see here. The editor allows you to format text, add links, images, and other html. See 'Adding Content - Simple Pages' below.

Sample Custom Page

17. To save your page, click Save or Save & Exit.

Add Content - Simple Pages

If you selected the Simple option, click 'Edit' on your newly created page. This will load the WYSIWYG content editor.

1. In the Page Content area, add content.

Below is obviously a very simplified example, but you can play with font sizes, colours, and formats. The editor is very much like what you've used in Microsoft Word or OpenOffice.

aragraph	√ 14px	~	Font We	ight 🗸	Image :	ize 🗸	/ Ima	ige Po	sition	\sim	в	U	I	≡	Ξ	≡	≣	<u></u> ×	
ore Colour 🖂	Back Colour \vee	A ~ .	× ×	↔ :	1. 2. 3.	ē	Ξ	8	8	⊞	~

amazing paragi	raph content. This	Paragra	aph text is	s automa	tically for	natted	in line	with r	ny site	e's sty	le gui	de.							
The same	is true for Quotatic	ons																	

2. To add images, embedded videos and links, click the Insert tab, then select the option you want. For instance, to add an image, select Insert Image. Upload the image and give it a description. Change the dimensions if you wish. Click OK to insert it. The selected image is now inserted into your page content.

3. For greater control, you can edit your content via the HTML code editor.

	Select Tools, then < > Source Code to access the code view. Here you can edit text formatting tags, resize images, or add other content directly into the HTML.	
	HTML source code

	and Headings.	
4. To save the pa	age, click Save & Exit .	
There an /html/ on	e plenty of online tutorials if your HTML knowledge is minimal or a bit rusty. Try http://www.w3schools.com for size.	

Add Content - Widget Based Pages

If you selected the Widget Based option, you are redirected to an empty template on first save of your new page. This is your blank canvas, all ready to go.

By default, custom pages are created using a single column layout with one row. Before adding widgets, you may wish to create a custom layout for your page. See our Layout Creator article for information on how to do this.

Single Column	ଦ୍ଧ Change

: CUSTOM:Spanish	372.19 528.49 5313.03 50.94 55.23 ***** ***** ***** ***** **** ***** ***** ***** **** **** ***** ***** ***** ***** ****	

- 3. You might like to start with an HTML Snippet Widget, or perhaps a Static Content Widget. If your custom page relates to a product promotion, why not a Campaign Slider Widget? Whatever you choose, you can add an unlimited number of widgets to any content zone on the page.
- 4. Once a widget has been added, it opens for you to configure the options.
- 5. Repeat as needed until your new page looks just right.

If you really want to get tricky, try targeting your content to different audiences using Layers or Personalisation.

If you created a 'Simple' page and have changed your mind, you can easily convert it to a 'Widget Based' page. Simply edit the page, hover on Options, then select Convert To Widget Template.
