Product List Filter Widget

Widget Use

Renders the 'Filter By' options on the product list page. Customers can filter their search or browsing results by metadata values such as Brand, Size, Colour, and so forth.

Example of Widget Use

Following is an example of the widget in use:

Where can the Widget be placed?

The widget can be used in the following templates:

Product List Template

Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	We recommended this field be updated so the widget's purpose is clear at a glance from the template page.	All

Layer	The layer the widget is valid for.	The layering technology allows for the content to be shown to specific audiences.	All
		This is handy if the content is only valid for a certain type of user, or if the same widget is required for more than one audience, but different configuration is needed.	
		The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.	
Allow Combinations?	Determines whether the user is permitted to filter by more than one variable at a time. When enabled, the user can select multiple filter	Default is: unticked	All
	options and click the button to apply them all.	Tick to enable	
	Note that when combinations are enabled, the entire list of filter options will be presented, not just those options which contain products.		
Show Clear All?	Determines whether the 'Clear All' option is presented to allow the user to remove all filters at once.	Default is: unticked	All
		Tick to enable	
Default Expanded Filters	A comma-separated list of filters that you would like automatically expanded on page load.	Note - Filter names are case-sensitive and should not include spaces.	All
		Example: Brand, Colour, Size	
Show Price Filter?	Determines whether a price filter option is presented, allowing filtering based on the integrated price for a product (NOT the calculated price).	Default is: unticked	All
	saces on the integrated price for a product (NOT the calculated price).	Tick to enable	
Default Price	Determines whether the price filter is automatically expanded on page load, so that the price slider is always visible.	Default is: unticked	All
Filter Expanded?	load, so that the price slider is always visible.	Tick to enable	
Show Default Minimum and Maximum Price Filters	Determines whether the min/max values specified here in the widget	Default is: unticked	3.94
	will be used when there are no min/max values associated with the category.	Tick to enable	
Default Price Filter Min	The minimum price value to be used if there is no min on the category itself.		3.94
Default Price Filter Max	The maximum price value to be used if there is no max on the category itself.		3.94
Show Product Feature Count?	Determines whether a product count is displayed next to the feature name in the Filter list on selection.	Default is: unticked	3.92
	For example - filtering by brand would display as "Apple (18)" if there are 18 product results when 'Apple' is selected.	Tick to enable	
Add Filtered Attribute Prefix?	Determines whether the metadata type is prefixed to the selected filter.	Default is: unticked	3.90
	For example - "Currently Filtered By: (Brand) Reflex" rather than "Currently Filtered By: Reflex".	Tick to enable	
Include Please Select Option In Mobile View?		Default is: unticked	
		Tick to enable	
Preview Top 5	Displays the Top 5 (by number of results) filter values only, with a 'see	Default is: unticked	3.95
Values	more' indicator for the user to display all. This keeps filter options with many values from obstructing other filters on the page.	Tick to enable	
Notifications			
No Filters Message	The text displayed when no metadata is present to filter by.	Default is: There are no filter options available	All
Buttons			
Combination	Determines the location of the 'Apply' button (top or bottom).	Default is: Bottom	All
Button Location		Select via drop-down	
Prompts			
Filter By Prompt	The heading text displayed at the top of the widget.	Default is: Filter By	All
, , , , , , , , , , , , , , , , , , , ,		Default is: Currently Filtered By	All
Current Filter	The heading text displayed above the filters that are currently in use.	, ,	
Current Filter Prompt Clear All Prompt	The label for the Clear All option.	Default is: Clear All Filters	All

Other Widgets

- Order Payment Links Form Widget Renders an order details stepper with an order form that can be automatically populated with query strings, and/or manually entered by the user. The form doesn't validate the order details are accurate in order to stay both secure and accessible to
