

# Flyer Creator Widget

## Widget Use

Renders the [Flyer Creator](#) interface and controls preferences such as Profit Calculation method and addresses override. Also used to customise button and field labels on the Flyer Creator page.

## Example of Widget Use

Populate from Campaign (optional):  
Music Sale

Choose layout:

Flyer Name:

Markup %:

Flyer Footer Text:

Add Products To Flyer:

Product Code	Description	Markup %	Cost Price Inc GST	Flyer Price Inc GST
<input type="text" value="CV170"/>	<input type="text" value="Beginner Band Set"/>	<input type="text" value="28"/>	<input type="text" value="31.34"/>	<input type="text" value="40.12"/>
<input type="text" value="CV172"/>	<input type="text" value="Bongos"/>	<input type="text" value="28"/>	<input type="text" value="62.69"/>	<input type="text" value="80.24"/>
<input type="text" value="CV173"/>	<input type="text" value="Cymbals"/>	<input type="text" value="28"/>	<input type="text" value="17.71"/>	<input type="text" value="22.67"/>
<input type="text" value="CV211"/>	<input type="text" value="Geometric Shape Solids"/>	<input type="text" value="28"/>	<input type="text" value="18.28"/>	<input type="text" value="23.4"/>

## Where can the Widget be placed?

The widget can be used in the following templates:

- Flyer Creator Template

## Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	This description is added to the widget title. It makes the widget's use clear on the template page.	All
Layer	The layer the widget is valid for.	Use <a href="#">layering</a> to limit widget content to certain groups of users.  To use the same widget for more than one user group but with different options set, add the widget as many times as needed in the same zone. Then add layering to define the user group each time.	All
Show Address Entry	Whether the customer address and contact details can be overridden for display on the flyer.	Default: OFF  Toggle to enable	3.94

Enable Ribbon Selection	Determines whether a ribbon can be selected for each product on the flyer.	Default: OFF Toggle to enable  <b>(NOTE - Custom widget needed for display. Please contact us for assistance)</b>	3.97
Ribbon Options	Semicolon-separated list of ribbon names that the customer can select from.	 <b>(NOTE - Custom widget needed for display. Please contact us for assistance)</b>	3.97
Enable Inc Or Ex GST Selection	Whether the "all prices include/exclude GST" message is displayed on the flyer. The flag to nominate Inc/Ex is displayed at flyer setup.	Default: OFF Toggle to enable  <b>(NOTE - Custom widget needed for display. Please contact us for assistance)</b>	3.97
Enable Was Price	Whether a field for the "was" price is available for the customer to set the previous price of each product.	Default: OFF Toggle to enable  <b>(NOTE - Custom widget needed for display. Please contact us for assistance)</b>	3.97
Profit Calculation	Method of profit calculation for all products on the flyer.  <ul style="list-style-type: none"> <li>• <b>Margin</b> - the value of sales less the cost of goods. Example: If you bought goods for \$70 and then onsold them for \$100, you'd make 30% margin.</li> <li>• <b>Markup</b> - the amount added to the cost price in order to arrive at the sale price. Example: If you bought goods for \$70 and then marked them up by 30%, you'd sell them for \$91. If you wanted to sell the goods for \$100, you'd need a 42.9% markup.</li> </ul>	Default: Markup	3.94
Custom Fields	Custom fields for customer contact details. These will display as input fields in flyer form. User responses are rendered in the PDF header.  <b>IMPORTANT</b> - Do not use this field unless your site will use a custom widget instead of the Customer Contact Details Widget to generate contact info in the PDF. Otherwise, contact details fields will not render in your flyer.	Each complete custom field must be entered in this format: FIELDNAMEID=FIELDLABEL  <ul style="list-style-type: none"> <li>• FIELDNAMEID - field identifier</li> <li>• FIELDLABEL - field label displayed to the user</li> </ul> Example: Address=Address  Field identifier and field label do not have to be the same. Multiple fields must be separated by semi-colons.  Example: Address=Address;Phone=Phone;Email=Email;Website=Website	4.37
<b>Labels</b>			
Campaign Selection Label	The label for the campaign dropdown selector.	Default: Populate from Campaign (optional):	3.94
