Edit custom widgets from the template page

A new option has been added to custom widgets when they appear on a page (or email) template. You can now select 'View Source Code' from the Options menu and be taken straight to the widget editing page! NICE.

So, from here:

Edit Template - Home Page Template	+ Back
≋ Widget Layout	
Zone: FullWidthTop	
CUSTOM:SubBanners	Contine Contin
Add Widget	<> View Source Code C₂ Copy ♀ Delete

To here:

Edit Widget : SubBanners	Cancel 🕒 Save & Exit
Widget Properties	Description *
Edit the widget name and description.	Home page sub banners
	Widget description explaining its purpose
	Cache Mode *
	None 🔻
<> Configuration Option Xml Xml definition of widget options	1
Source Code Razor source code for the widget	<pre>1 <div class="homepage-sub-banner-area"> 2 <div class="grid-row"> 3 <div class="grid-row"> 3 <div class="col-1-3"> 4 <div class="col-1-3"> 5 <div class="col-1-3"> 6 </div> 7 </div> 6 </div> 7 7 7 7 7 7 7 7 7 10 </div></div></div></pre>
	0.png"> 15 All [brand] products on sale now! 16 Learn More 17 18
