

# Product Category Quick View

## Overview

To optimise speed in scenarios where live pricing calls are made to PRONTO, Quick View functionality can be enabled. With Quick View, product pricing and availability are not shown on initial page load. Instead, these calls are made to the server on demand when the user clicks 'Quick View'. That data is then cached for the user, thereby improving speed and performance.

This guide covers the implementation of Quick View for product lists such as category and sub-category pages. Quick View is used in conjunction with the [Campaign Slider \(Product Category Product Summary widget\)](#), which populates sub-category lists via stored procedure. You'll need to [contact Commerce Vision](#) for assistance with the stored procedure.

Quick View Minimised	Quick View Expanded
<div><h3>Oil Paint</h3><div><div><p>Artisan Water Mixable Oil Paint 37ml Assorted Colours, Pack of 6</p><p>Code: 2837641   Unit Set</p><p><b>QUICK VIEW</b></p></div><div><p>DAS Inspire Oil Colour Paint 12ml Assorted Colours, Pack of 12</p><p>Code: 2626977   Unit Pack</p><p><b>QUICK VIEW</b></p></div><div><p>DAS Inspire Oil Colour Paint 12ml Assorted Colours, Pack of 18</p><p>Code: 2626985   Unit Pack</p><p><b>QUICK VIEW</b></p></div></div></div> <div><h3>Oil Paint</h3><div><div><p>Artisan Water Mixable Oil Paint 37ml Assorted Colours, Pack of 6</p><p>Code: 2837641   Unit Set</p><p><b>QUICK VIEW</b></p></div><div><p>\$7.</p><p>✓ In</p><p>Co</p></div></div></div>	

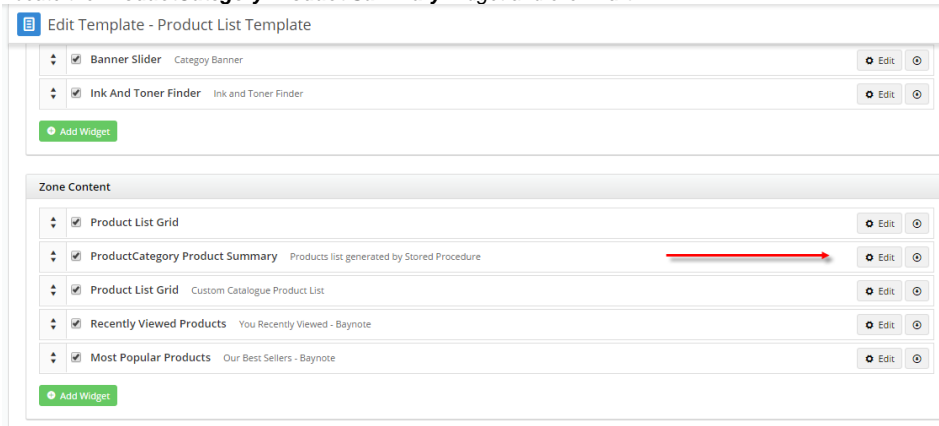

## Step-by-step guide

To implement Quick View, you are essentially hiding the Product's footer zone, which expands once the user clicks the 'Quick View' button.

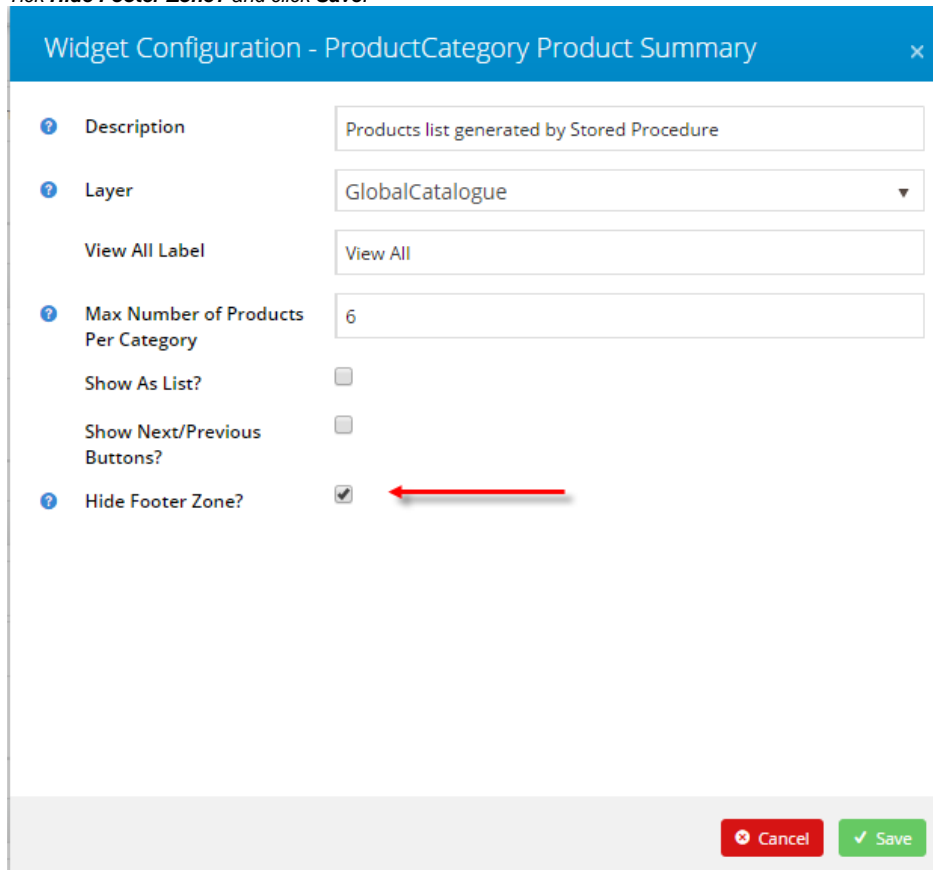

To hide the footer zone from category and subcategory 'campaigns':

1. In the CMS, navigate to **Content   Standard Pages**.
  2. Select the **Product List** template.

3. Locate the **ProductCategory Product Summary** widget and click **Edit**.

4. Tick **Hide Footer Zone?** and click **Save**.

**NOTE** - The footer zone can also be hidden from products in the standard Campaign Slider, by repeating the above steps in the Campaign Slider widget.

Next, add the 'Quick View' button itself to the product tile, and ensure data such as Price, Availability, Alternates, and Attributes are located in the footer:

1. Navigate to **Content Standard Pages**.
2. Select the **'Product List Item Zoned'** template.

3. Add the **Product List Live Pricing Button** widget to zone **Column2Left**.

Edit Template - Product List Item Zoned Template

Widget Layout

Zone Column1

Product List Image

Add Widget

Zone Column2Left

Product List Product Title

Product List Product Code

Product List Unit Description

Product List Attributes

Product List Best Buy Message

Product List Alternates

Product List Cost Centre

Product Availability

Product List Live Pricing Button

Add Widget

4. Ensure widgets such as Price, Qty Box, Add To Cart, etc. are located within zone **Footer**.

Zone Footer

Product List Price

Product List Price Inc

Product List Price Ex

Product List GST

Product List RRP

Product List Attributes

Product Availability

Product List Qty Box

Product List Add To Cart

Product List Additional Options

Product List Download Button

Product List Add To Favourites

Product List Compare

Product List Qty Breaks

Product List Additional Options

Add Widget

5. Customise options as required.
