

Buy Now, Pay Later

Overview

Add one or more Buy Now, Pay Later payment options on your Commerce Vision platform. Zip, Openpay, Afterpay, Payright and PayPal Pay in 4 are seamlessly integrated.

Giving your customers another way to pay for purchases can make shopping easier and remove barriers to purchasing. It can also translate to increased sales for you.

Along the same lines as old fashioned Lay-by, with Buy Now Pay Later, the customer pays for their purchase in instalments over a period of time. The difference is with Buy Now, Pay Later, they get their goods **now**, not when the purchase is paid off.

What's the difference?

While they all operate on a similar principle, there will be some differences among the options. Consult with the Buy Now Pay Later providers for more information.

NOTE - PayPal Pay in 4 is available for your site with [Braintree Payments](#).

What it looks like

Depending on your site's configurations, potential buyers will be presented with a *Buy Now, Pay Later* option with information about instalments and a link to learn more in the Product Detail page, Cart page and as payment during checkout.
