

Banner Slider - banner maintenance link

New shortcut!

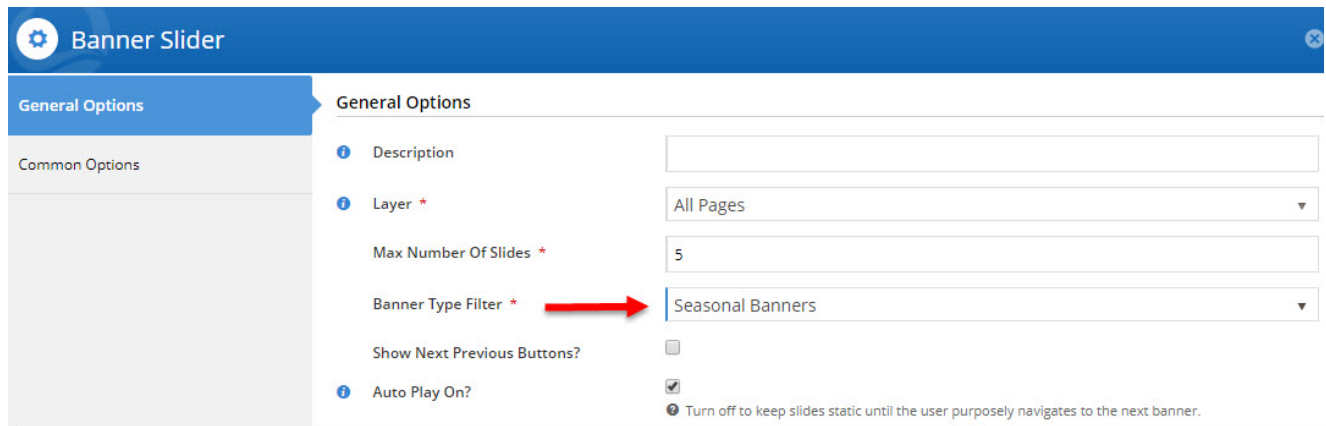

Adding and editing banners for your slider just got easier.

When you're editing a page with a Banner Slider widget on it, you can now use the options menu to go directly to banner maintenance.

The Banners link is even smart enough to know which banner *Type* your widget displays, so you're navigated to exactly where you need to be.

For example, if your widget is filtered for 'Seasonal Banners', then clicking the Banners option on the widget will navigate you straight to the maintenance page for Seasonal Banners.

Another time-saving initiative, brought to you by Commerce Vision 😊.
