## Where can the Widget be placed?

The widget can be used in the following templates:

- Return Confirmation Page Template

## Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	We recommend this field be updated so the widget's purpose is clear at a glance from the template page.	All
Layer	The layer the widget is valid for.	The <a href="#">layering technology</a> allows for the content to be shown to specific audiences.  This is handy if the content is only valid for a certain type of user, or if the same widget is required for more than one audience but different configurations are needed.  The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.	All
Show Image?	Determines whether the product thumbnail image is displayed in the return order lines.	Default is: enabled  Untick to disable	4.05
Placeholder Image	The fallback product image to use when there is no product image found (and "Show Image" is enabled)		4.05
Use Hyperlink on Image?	Determines whether the thumbnail image is hyperlinked to the product detail page (where "Show Image" is enabled)	Default is: disabled  Tick to enable	4.05

Show Unit Description?	Determines whether the product unit of issue is displayed (e.g. each, box, pair) in the return order lines.	Default is: disabled Tick to enable	4.05
Show GST?	Determines whether the GST component of the price is displayed in the return order lines.	Default is: disabled Tick to enable	4.05
Itemise Charges?	Determines whether additional charges are displayed separately in the return order lines.	Default is: disabled Tick to enable	4.05
