+

☐ I understand the [TnC's](#)

☐ Items are in a resalable condition

☐ Items are ready for collection

☐ Items are securely packaged

Where can the Widget be placed?

The widget can be used in the following templates:

- Submit Return Page Template

Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	We recommend this field be updated so the widget's purpose is clear at a glance from the template page.	All
Layer	The layer the widget is valid for.	<p>The layering technology allows for the content to be shown to specific audiences.</p> <p>This is handy if the content is only valid for a certain type of user, or if the same widget is required for more than one audience but different configurations are needed.</p> <p>The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.</p>	All
Return Information Header	The heading displayed at the top of the widget	Default is: Return Information	4.05
Reason Code Prompt	The label for the return reason dropdown.	Default is: Reason Code	4.05
Number of Parcels Prompt	The label for the qty input field for the number of parcels being returned by the user.	Default is: Number of Parcels to pick up	4.05
Reason Code Required Message	The validation message displayed to the user when they attempt to submit a return without electing a reason code.	Default is: Reason code is required	4.05

No Of Parcels Required Message	The validation message displayed to the user when they attempt to submit a return without indicating the number of parcels to be returned.	Default is: Number of parcels is required	4.05
Validate Fields Message	The validation message displayed to the user when they attempt to submit a return without filling in multiple required fields.	Default is: Please fill up all mandatory fields	4.05
