Delete a Website User

Overview

On occasion, Administrators may want to remove a user from the database completely. This is done either in Website User Maintenance in the CMS or on the website in User Maintenance. Users with active orders cannot be deleted.

If you just want to prevent a user from logging into your site, see: Disable/deactivate a User.

Step-by-step guide

Add, edit and configure website users in the CMS.

To turn off the Confirm step, on the website, go to Settings General. Untick Show Confirm On Grid Delete/Remove.

Delete a user in User Maintenance

- 1. As Website Administrator, go to Accounts User Maintenance (zUsers.aspx).
- 2. Use the Search tool to find the user account.
- 3. Click the radio button next to user account.
- 4. On the user details page,, click Delete.
