

# PRONTO Integration - Customer Transactions

On Integration of '**Customer Transactions**', the following PRONTO table will be integrated, triggered by the change event listed:

Table Name	Change Events	Filters
deb-trans	dr-tr-date-stamp	Debtor Inclusions. This is set in CSS: 'Settings' - 'Integrations' tab - 'Customers' tab - field name 'Debtor Inclusions'.

 **Integrating All vs Changed:** 'Customer Transactions' date stamp comes from the debtor's record. The value of dr-tr-date-stamp is to be greater than or equal to the last sent date of 'Customer Transactions'.
