PRONTO Integration - Product Categories

On Integration of **'Product Categories'**, the following PRONTO tables will be integrated, triggered by change events for each table:

Table Name	Change Events	Filters
system-table	All records sent	Alternate Sort Code. Located in Integrator 'Settings', 'Advanced' tab, 'Other Settings'. System Table Types to Send. Located in Integrator 'Settings', 'Advanced' tab, 'Other Settings'. Generally equal to OG, PG, TG or Alternate Sort Code.
system-messages	All records sent	Alternate Sort Code. Located in Integrator 'Settings', 'Advanced' tab, 'Other Settings'. (? can't find this setting. copied this line from MO's old doc. Out of date?) sys-message-type equal to PG, OG or Alternate Sort Code. Located in Integrator 'Settings', 'Advanced' tab, 'Other Settings'.

ⓘ **Integrating All vs Changed**: For 'Product Categories', there is no difference between sending All vs Changed. All records are integrated.
