

# CSV Cart Export

## Overview

From version 3.92+, users can export their shopping cart to CSV file. Originally designed for B2B users to generate purchase orders, any user can add items to their cart, then export the lines to a CSV file for upload into their ERP.

## How it works

This functionality is role-based and must be enabled for the users who need it. You can also override the availability of this functionality at the individual user level.
