

CMS Product maintenance collapsible sections

We've streamlined the look and feel of the Product Maintenance page to make it easier to find the data you're looking for.

Check out our new [Product Maintenance Page](#)

All sections are collapsed by default, giving you a clean view of the available information. Expand one section, or use the Options menu to expand them all. Your preference will be remembered as you move from page to page.

This release also includes the product title after the product code to clearly identify what product you currently maintain.

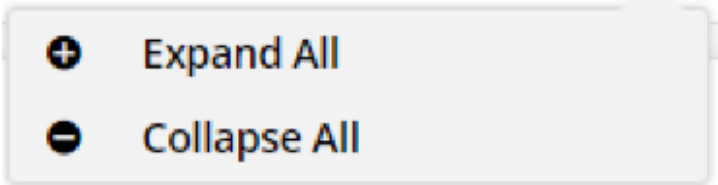

This is what it looks like:

- Additional Product Title

Maintain Product: CV100 - Endurance T10HRC Treadmill Great Product

- Collapse setup

- Category changes from default fields into dynamic collapsed fields
