

# Common Options Tab for Custom Widgets

Enable your custom widgets to include the Common Options tab, ensuring consistency in widget configuration. The Common Options tab allows you to control the devices on which your widget displays, set alignment and print parameters, and add additional style classes.

## Step-by-step guide

1. In the CMS, navigate to **Advanced Content Custom Widgets**.
2. Click **Edit** next to a widget that is in use (depicted by Used n time indicator in the **In Use?** column).

Widget Name	Description	In Use?	Last Edited	Options
DashboardAccountManager	Display account manager details		19/06/2017	<input type="radio"/> Edit <input type="radio"/> Options
DashboardAccountStatus	Display account status	Used 1 time	08/03/2017	<input type="radio"/> Edit <input type="radio"/> Options
DashboardArticles	Dashboard Articles	Used 1 time	08/03/2017	<input type="radio"/> Edit <input type="radio"/> Options
DashboardBackOrders	Display the top 5 back order lines for the current logged in user	Used 1 time	23/09/2019	<input type="radio"/> Edit <input type="radio"/> Options

3. If we look at the **DashboardBackOrders** custom widget, then we see that the **Include Common Options** parameter is OFF.

Include "Common Options"  
This will wrap the Source Code in a DIV tag with ID and CLASS based on the widget name - i.e. <div id="WidgetCode" class="WidgetClass"></div>

```
1<property name="ViewAllButton" type="String" default="View All Button (n)" />
2<property name="ViewAllButtonText" type="String" default="View All" />
3<property name="ViewAllButtonLabel" type="String" default="View All Button Label" group-id="ButtonLabelGroup" />
4<property name="ViewAllButtonIcon" type="Icon" default="ico-general-plus" prompt="View All Button Icon" displayType="IconSelector" group-id="ButtonIconGroup" />
5<property name="TitleIcon" type="String" default="ico-general-history" prompt="Title Icon" displayType="IconSelector" group-id="TitleGroup" />
6<property name="TitleText" type="String" default="Your Order # " prompt="Title Text" displayType="Text" group-id="TitleGroup" />
7<property name="YourOrderNumberHeading" type="String" default="Your Order # " prompt="Your Order Number Heading" group-id="PromptGroup" />
8<property name="PartNumberHeading" type="String" default="Part Number" prompt="Part Number Heading" group-id="PromptGroup" />
9<property name="BackOrderQuantityHeading" type="String" default="0/0" prompt="Back Order Quantity Heading" group-id="PromptGroup" />
10<property name="NoDataMessage" type="String" default="Currently no data to be loaded" prompt="No Data Message" group-id="MessageGroup" />
11<property name="LoadingDataMessage" type="String" default="Loading Data" prompt="Loading Data Message" group-id="MessageGroup" />
12<property name="LoadingDataMessageLabel" type="String" default="Loading Data Message" prompt="Loading Data Message" group-id="MessageGroup" />
```

4. You can check where that widget is used by clicking **Options Where is it used?**

Where is it used  History  Data Sources  Delete

Where is this widget used?

- Template: Dashboard Page
- Widget: DashboardBackOrders in Zone Left Enabled

OK

```
<div id="WidgetCode" class="WidgetClass"></div>
```

5. Click the Template directly from the **Where is this widget used?** pop-up, or navigate to the page location: **Content Pages & Templates Accounts Dashboard Page**
6. Find the widget in the Page Template and click **Edit**.

7. You can see that there are only two tabs: General Options and Personalisation.

8. View the HTML code (Chrome: Inspect; Firefox: Inspect Element). Take note of the lines between the highlighted line:<div class="content-box dashboard-module dashboard-back-orders">...> and the <header class="box-title" ... "Back Orders" />.

```

<div class="content-box dashboard-module dashboard-back-orders">...</div>
<header class="box-title" ... "Back Orders" />

```

9. Exit out of the widget and head back to the DashboardBackOrders custom widget by clicking Options and selecting <>View Source Code or navigating to Advanced Content Custom Widgets.

10. Click **Edit** on the **DashboardBackOrders** widget, and this time, toggle **Include 'Common Options'** to ON.

11. Save your changes and return to **Content Pages & Templates Accounts Dashboard Page**.

12. Edit the **DashboardBackOrders** widget and click on the **Common Options** tab.

13. You will see all the options available on the **Common Options** tab that is available on all non-Custom widgets.

14. View the **HTML code** (Chrome: Inspect; Firefox: Inspect Element).

Note the addition of the '`<div>`' tag for the **Dashboard Back Order Custom Widget** surrounding the `<div class="content-box dashboard-module dashboard-back-orders">...` and the `<header class="box-title" ... "Back Orders" </header>` highlighted in the pre-enabled view.

```

<div id="dashboard-backorders-38a7f032-5fc4-4405-a3bd-826b042b0669" class="cv-ico-general-history cv-ico-general-history-38a7f032-5fc4-4405-a3bd-826b042b0669" data-bind="dashboar...
  <div class="content-box dashboard-module dashboard-back-orders" data-role="backorderlines" data-view="true" data-top-count="5" data-order-by="ProntoSalesOrder.SoOrderDate DESC">
    <before>
      <div class="cv-widget-view-wrapper">
        <header class="box-title cv-ico-general-history ico-heading">
          <h2>Back Orders</h2>
        </header>
        <div class="grid-row">
          <div class="grid-item">
            <table border="1">
              <thead>
                <tr><th>Order Date</th><th>Your Order #</th><th>Part Number</th><th>B/I Qty</th><th>ETA</th></tr>
              </thead>
              <tbody>
                <tr><td>20/08/2019</td><td>44058</td><td>CV209</td><td>1</td><td>20/08/2019</td></tr>
                <tr><td>20/08/2019</td><td>440564</td><td>CV174</td><td>1</td><td>20/08/2019</td></tr>
                <tr><td>20/08/2019</td><td>440564</td><td>CV118</td><td>1</td><td>20/08/2019</td></tr>
                <tr><td>20/08/2019</td><td>44058</td><td>CV109</td><td>1</td><td>20/08/2019</td></tr>
                <tr><td>20/08/2019</td><td>44058</td><td>CV109</td><td>1</td><td>20/08/2019</td></tr>
              </tbody>
            </table>
          </div>
        </div>
      </div>
    </before>
    <section class="box-content" data-bind="addTpProcessingClass: isloadingList">
      <div class="cv-ico-general-history-38a7f032-5fc4-4405-a3bd-826b042b0669" style="display: none;"></div>
    </section>
  </div>
</div>

```

15. To test it, edit the **CUSTOM:DashboardBackOrders** widget again and toggle **Show On Mobile?** to OFF.

**16. Save your changes and notice the difference to the widget.**

You can read more about the device icon display in the [Widget Device Display Indication: Mobile, Tablet, and Desktop help page](#).
