

Email Order Address Widget

Widget Use

Renders the order's address information in email output.

Example of Widget Use

Following is an example of the widget in use:

Where can the Widget be placed?

The widget can be used in the following templates:

- Any Email Template

Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	We recommended this field be updated so the widget's purpose is clear at a glance from the template page.	All
Layer	The layer the widget is valid for.	<p>The layering technology allows for the content to be shown to specific audiences.</p> <p>This is handy if the content is only valid for a certain type of user, or if the same widget is required for more than one audience, but different configuration is needed.</p> <p>The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.</p>	All

Address Title	The heading text displayed at the top of the widget.	We recommend this field be related to one of the possible delivery options: 'pickup address', 'delivery address' or 'email delivery'.	Email delivery: 4.20
Address Type	<p>The content displayed by the widget. Select from:</p> <ul style="list-style-type: none"> • Billing Address • Delivery Address • Pickup Address • Email Address 	<p>Default is: Billing Address</p> <p>Select via drop-down</p>	Email address: 4.20
Show Additional Address Field?	When enabled, address line 6 will display as the first line of the address (where populated).	<p>Default is: unticked</p> <p>Tick to enable</p>	3.92
