# HTML Snippet Widget

Widget Use

Renders HTML code such as embed / tracking code, or third party scripts.

Please note - for content involving lists, tables, or formatted text (for example), the Static Content widget may be a better choice, as it supports your site's Style Guide.

Example of Widget Use

Where can the Widget be placed?

The widget can be used in the following templates:

* All Templates

Widget Options

Option	Use	Comments	Available from Version
Description	A short description of the widget's use.	We recommended this field be updated so the widget's purpose is clear at a glance from the template page.	All

Layer	The layer the widget is valid for.	The layering technology allows for the content to be shown to specific audiences. This is handy if the content is only valid for a certain type of user, or if the same widget is required for more than one audience, but different configuration is needed. The widget can be added to the zone more than once and the layer feature can determine which audience can see each widget.	All
HTML	HTML code is entered here, to be displayed on the site in the widget's location.		All
Show On Mobile?	Determines whether the widget is displayed on a mobile device. If unticked, the HTML snippet will be hidden on mobile devices.	Default is: ticked Untick to disable	All
Right Align?	Pushes the widget to the right of the zone it is located in.	Default is: unticked Tick to enable	All
